The Heritage Impact Assessment by the heritage specialist ,Frans Prins and the recommendations therein have been considered . The report indicates that various grave sites were observed during the ground survey but none occur closer than 30m to the proposed development site. The development is not considered to be a threat to any known heritage resources as none were observed in the development footprint and its immediate surroundings.

For this reason Amafa has no objection to the development provided the developer operates within the confines of the stipulated recommendations and protocol provided.

You are also required to adhere to the below-mentioned standard conditions:

Conditions:

1. Amafa should be contacted if any heritage objects are identified during earthmoving activities and all development should cease until further notice.
2. No structures older than sixty years or parts thereof are allowed to be demolished altered or extended without a permit from Amafa.
3. No activities are allowed within 50m of a site, which contains rock art.
4. Sources of all natural materials (including topsoil, sands, natural gravels, crushed stone, asphalt, etc.) must be obtained in a sustainable manner and in compliance with the heritage legislation.

Failure to comply with the requirements of the National Heritage Resources Act and the KwaZulu Natal Heritage Resources Act could lead to legal action being instituted against the applicant.
