Interim Comment

In terms of Section 38(3), 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Savannah Environmental (Pty) Ltd

PO Box 148
Sunninghill
2157

South Africa Mainstream Renewable Power Developments (Pty) Ltd is proposing the construction and operation of the 75 MWac Rondavel Photovoltaic (PV) Solar Energy Facility (SEF) and Battery Energy Storage System (BESS), near the town of Kroonstad in the Moqhaka Local Municipality (Fezile Dabi District) of the Free State Province of South Africa. The proposed development traverses four (4) farm parcels namely: » Remaining Extent of the farm Rondavel Noord No. 1475 (main site); and » Remaining Extent of the farm Rondavel No. 627 (main and grid site).

South Africa Mainstream Renewable Power Developments (Pty) Ltd appointed Savannah Environmental (Pty) Ltd to undertake the Environmental Authorisation application for the proposed construction and operation of the 100 MW Rondavel Photovoltaic Solar Energy Facility, Battery Energy Storage System (BESS) and associated infrastructure located near Kroonstad in the Moqhaka Local Municipality, Fezile Dabi District in the Free State Province.

A draft Scoping Report (SR) has been submitted in terms of the National Environmental Management Act (NEMA; Act No. 107 of 1998) and the NEMA 2014 EIA Regulations, as amended. The project site has an extent of 2027ha and will be located within the Remaining extent of the Farm Rondavel Noord No. 1475 and the remaining extent of the farm Rondavel No. 627. It will be connected to the grid via a separately authorised grid connection solution.

The infrastructure associated with the facility includes solar PV array, inverters and transformers, cabling, on-site facility substation, battery energy storage system (BESS), site offices and maintenance buildings, laydown areas and access roads, fencing around the development area and telecommunication infrastructure, stormwater channels and water pipelines.

CTS Heritage has been appointed to provide heritage specialist input as part of the EA application as required by section 24(4)b(iii) of NEMA and section 38(3) and 38(8) of the National Heritage Resources Act, Act 25 of

1999 (NHRA).

Lavin, J. 2020. Heritage Screening Assessment for the Proposed development of the Rondavel Solar Energy Facilities near Kroonstad, Free

The study area is underlain by the Adelaide Subgroup (Beaufort Group) and Volksrust Formation as well as Jurassic Dolerite intrusions. The areas proposed for development are underlain by sediments of moderate to very high palaeontological sensitivity according to the SAHRIS PalaeoSensitivity Map. Based on other heritage finds in the broader Kroonstad area, potential exists for archaeological resources within the development area.

It is likely that the proposed development will negatively impact on significant archaeological and palaeontological heritage resources, as such, it is recommended that an HIA is required.

An interim Comment dated 15/01/2021 was issued by SAHRA which requested the submission of the Heritage Impact Assessment (HIA) inclusive of an Archaeological and Palaeontological Impact Assessment along with the Final Scoping Report.

The Final Scoping Report was uploaded to the case on the 19/01/2021 which notes that comment from SAHRA. The response on Page 10 and 11 of Appendix C8 states that the Heritage Specialist study will be submitted and the EIA and its appendices will be uploaded to the case at the start of the public review period.

Interim Comment

The SAHRA APM unit notes that the heritage specialist studies will be submitted along with the EIA report. Further comments will be issued upon receipt of the Heritage specialist studies along with the draft EIA document along with its appendices.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
