The proposed project entails construction of water supply pipelines, reservoirs and associated infrastructure at KwaXolo Village in KwaZulu Natal Province

Thank you for the opportunity to comment on the project. The Heritage Impact Assessment compiled by Sativa Travel and Environmental Consultants on the proposed pipeline and reservoir has been considered. Amafa notes that the survey did not yield heritage resources on the largely degraded environment other than a burial/grave site located within a homestead precinct in the Gcilima area. The graves should not be disturbed, damaged, exhumed and/relocated, destroyed or altered without a permit from Amafa and approval by the family with attachment/interest in the graves.

Amafa therefore has no objection to the development in view of the findings outlined in the HIA Report provided the developer, its subsidiaries, contractors and subcontractors, or service providers operate within limits of the prescribed mitigation measures and recommendations as outlined in the report and this letter of decision.

You are also required to adhere to the below-mentioned standard conditions:

Conditions:

1. Amafa should be contacted if any heritage objects are identified during earthmoving activities and all development should cease until further notice.
2. No structures older than sixty years or parts thereof are allowed to be demolished altered or extended without a permit from Amafa.
3. No activities are allowed within 50m of a site, which contains rock art.
4. Sources of all natural materials (including topsoil, sands, natural gravels, crushed stone, asphalt, etc.) must be obtained in a sustainable manner and in compliance with the heritage legislation.

Failure to comply with the requirements of the National Heritage Resources Act and the KwaZulu Natal Heritage Resources Act could lead to legal action being instituted against the applicant.

This decision is **valid for a period of two years.**

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.
