Final Comment

In terms of Section 38 of the National Heritage Resources Act (Act 25 of 1999)

Attention: EnviroServ

A PHASE I HERITAGE IMPACT ASSESSMENT STUDY FOR THE PROPOSED EXPANSION OF ENVIROSERV'S EXISTING CHLOORKOP LANDFILL SITE (CLS) ONTO ADJACENT PROPERTIES IN MIDRAND, GAUTENG PROVINCE

Pistorius, J. April 2019. A Phase I Heritage Impact Assessment Study For The Proposed Expansion Of Enviroserv's Existing Chloorkop Landfill Site (CLS) Onto Adjacent Properties In Midrand, Gauteng Province

The proposed development entails expansion of a landfill site within an existing industrial hub.

The archaeological assessment for the proposed expansion of the Chloorkop Landfill Site Project did not reveal the presence of any significant archaeological resources.

The SA Palaeontological Sensitivity Map indicates that the study area has Insignificant fossil sensitivity.

Final Comment

In terms of archaeological and palaeontological heritage, the SAHRA Archaeology, Palaeontology and Meteorites Unit has no objections to this proposed development, provided that the recommendations in the specialist reports and this comment are adhered to, and on the following conditions:

- If any evidence of archaeological sites or remains (e.g., remnants of stone-made structures, indigenous ceramics, bones, stone artefacts, ostrich eggshell fragments and charcoal/ash concentrations) or palaeontological remains are found during the proposed activities, SAHRA must be alerted immediately, and a professional archaeologist or palaeontologist, based on the nature of the finds, must be contacted as soon as possible to inspect the findings. If the newly discovered heritage resources prove to be of significance a Phase 2 rescue operation might be necessary.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.
