We have received notification of your application for an environmental management plan in respect of prospecting rights for several farms in the Hay District, Northern Cape.

In terms of the National Heritage Resources Act (NHRA), no 25 of 1999, heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years, structures older than 60 years are protected. They may not be disturbed without a permit from the relevant heritage resources authority. This means that before such sites are disturbed by development it is incumbent on the developer (or mine) to ensure that a Heritage Impact Assessment is done. This must include the archaeological component (Phase 1) and any other applicable heritage components. Appropriate (Phase 2) mitigation, which involves recording, sampling and dating sites that are to be destroyed, must be done as required.

It is noted by SAHRA in the EMP that a Heritage Scoping and Impact Assessment are planned for this proposal.

SAHRA thanks you in advance for these documents and will review them and provide comment on them upon receipt.
