

Final Comment

In terms of Section 38 of the National Heritage Resources Act (Act 25 of 1999)

Attention: City of Tshwane Metropolitan Municipality
PO Box 440
Pretoria
0001

Proposed construction of a stormwater network, formalisation of a natural stream and the relocation of services as needed in Karenpark.

Van Schalkwyk, J. February 2014. Cultural heritage impact assessment for the Proposed Storm Water Pipeline Installation, Heinrich Avenue, Karen Park, Gauteng.

The proposed development entails the installation of a larger stormwater pipeline in the Heinrich Avenue region of Karen Park, north of Pretoria, necessitated by rapid urban development in the region.

The author states that no archaeological heritage sites are known or were found to occur in the study area and that any historic farmsteads older than 60 years that may have existed have either disappeared or have been significantly altered.

Final comment

The SAHRA Archaeology, Palaeontology and Meteorites Unit has no objection to the proposed development in terms of archaeological heritage resources. As the nature of the development will not have an impact on possible palaeontological resources, no palaeontological assessment is required. If any new evidence of archaeological sites or artefacts, palaeontological fossils, graves or other heritage resources is found during development, SAHRA and an archaeologist and/or palaeontologist, depending on the nature of the finds, must be alerted immediately.

If the development will have any impact on Built Environment heritage resources, decisions regarding these resources must be obtained from the Gauteng Provincial Heritage Resources Authority.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Andrew Salomon

Heritage Officer: Archaeology
South African Heritage Resources Agency

Colette Scheermeyer
