

Final Comment

In terms of Section 38 of the National Heritage Resources Act (Act 25 of 1999)

Attention: City of Tshwane Metropolitan Municipality
PO Box 440
Pretoria
0001

Construction of a Pedestrian Walkway/Cycle Path Network in the Temba Area, City of Tshwane Municipality, Gauteng

Küsel, U. May 2013. Cultural Heritage Resources Impact Assessment For The Construction Of A Proposed Pedestrian Pathway And Cycle Path At Temba, Gauteng Province.

The proposed project entails:

- The construction of walkways from the sports precinct to the Hammanskraal CBD in the Kudube Activity Node and through to the Jubilee mall along road D2757, the total length of the walkways constructed on both sides on the roadway is approximately 7.0km.
- The construction of a cycle path along the R734, R101 and road D2757 up to the Jubilee Mall constructed on both sides of the roadway for a total length of approximately 7.0km.
- The proposed walkways and cycle paths will be constructed across the Apies River.

The author states that the pathways are next to existing tar roads in the road reserve and that the areas have been graded in the past, destroying any possible heritage sites. The author states that no significant cultural heritage resources or graves were found on or near the proposed pathway routes.

Decision

The proposed development takes place in an area of high possible palaeontological sensitivity, but considering that the nature of the development is unlikely to affect possible palaeontological heritage resources, a palaeontological assessment is not required.

SAHRA Archaeology, Palaeontology & Meteorites (APM) Unit has no objection to the proposed development on the condition that if any evidence of archaeological sites or remains, unmarked human burials, fossils or other categories of heritage resources are found during the proposed activities, SAHRA APM Unit must be alerted immediately, and a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contacted as soon as possible to inspect the findings. If the newly discovered heritage resources prove to be of archaeological or palaeontological significance a Phase 2 rescue operation might be necessary.
