Heritage Impact Assessment Knopjeslaagte – Portion 71 of the Farm Knopjeslaagte

Van der Walt, J. February 2018. Heritage Impact Assessment: The Proposed Peach Tree Extension 26 Residential Development On Portion 71 Of The Farm Knopjeslaagte 385-JR

The proposed development entails the Peach Tree Extension 26 residential development on Ptn 71 Knopjeslaagte 385 JR.

The assessment recorded no archaeological sites or material.

The SA Palaeontological Sensitivity Map indicates that the study area has Insignificant fossil sensitivity.

Final Comment

In terms of archaeological and palaeontological heritage, the SAHRA Archaeology, Palaeontology and Meteorites Unit has no objections to this proposed development, provided that the recommendations in the specialist reports and this comment are adhered to, and on the following conditions:

- If any evidence of archaeological sites or remains (e.g., remnants of stone-made structures, indigenous ceramics, bones, stone artefacts, ostrich eggshell fragments and charcoal/ash concentrations) or palaeontological remains are found during the proposed activities, SAHRA must be alerted immediately, and a professional archaeologist or palaeontologist, based on the nature of the finds, must be contacted as soon as possible to inspect the findings. If the newly discovered heritage resources prove to be of significance a Phase 2 rescue operation might be necessary.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.
