Mainstream Springfontein Wind Energy Facility DEA Ref No 14/12/16/3/3/2/365

Gaigher, S. July 2012. Heritage Impact Scoping Report: Proposed Establishment of the Mainstream Springfontein Wind Energy Facility near Springfontein in the Free State Province.

The author of the Heritage Scoping Report notes that the study area appears to be lacking in recorded resources, although recent studies revealed heritage components connected to the South African War and the Stone Age.

The author recommends that the site be subjected to a full Heritage Impact Assessment, including Palaeontology, before the development continues.

Decision:

The SAHRA Archaeology, Palaeontology and Meteorites Unit supports the recommendations of the author that the site be subjected to a full Heritage Impact Assessment (HIA), including Palaeontology, before the development continues.

The findings and recommendations of this HIA will then be commented upon by SAHRA.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Andrew Salomon
