Dear Ms Matabane,

RE: EXTENTION OF PERMIT ID: 2961 FOR RELOCATION OF 19 ADDITIONAL GRAVES AND TESTING FOR 10 POTENTIAL GRAVES AS PART OF EROS-VUYANI 400 KV ESKOM POWER TRANSMISSION LINE IN THE EASTERN CAPE PROVINCE GRAVE RELOCATION PROGRAMME IN TERMS OF NHRA: 36(3)

NGT Holdings (Pty) Ltd (“NGT”) would like to extends its permit (i.e. Permit ID 2961) for the exhumation and relocation of 37 graves that were exhumed in 2019 as part of the above mentioned project, to include 19 additional graves that were identified in 2019 as part of NGT grave relocation programme. NGT would also like to undertaken test and search for 10 potential graves of infants within the affected households – the families know that they buried infants in their homesteads but are not sure of exact location of the burials since their graves were not marked.

The initia application on the same project was granted a Permit by SAHRA BGG Unit (i.e. Permit ID 2961) on the 02/07/2019, a permit valid until the 02/07/2021. Although NGT had a permit it could not proceed with the exhumation and relocation of the 19 additional graves and testing for the 10 graves as they were not authorised by SAHRA BGG, thus the current application for their addition in the work scope and our request to also test for 10 potential graves (infants).

In addition to the public consultation process information that was undertaken by the previous consultant on the project, NGT also published a newspaper notice in 2019 to ask the affected families and their relatives to come forward with any additional information that could be of assistance the project and NGT to conclude the programme and handover the project to Eskom. To date, not one has come forward with new information thus our resolve to proceed with with the programme.

I look forward to your correspondence on this matter

Kind regards

.....
Mr. Nkosinathi Tomose, **Head of Research, Strategy and Business Development**
