### PER EMAIL / MAIL

Dear Mr Marais

### **AMENDMENT OF THE ENVIRONMENTAL AUTHORISATION ISSUED ON 14 MARCH 2022 FOR THE PROPOSED ILIKWA SOLAR PV FACILITY, FREE STATE PROVINCE**

The Environmental Authorisation (EA) issued for the abovementioned application by this Department on 14 March 2022, your application for amendment of the EA received by the Department on 14 July 2022 and the acknowledgement letter dated 26 July 2022, refers.

Based on a review of the reason for requesting an amendment to the above EA, this Department, in terms of Chapter 5 of the Environmental Impact Assessment Regulations, 2014 as amended, has decided to **amend** the EA dated on 14 March 2022 as amended, as follows:

#### **Amendment 1: Change to the name of the holder of the EA**

##### **From:**

South Africa Mainstream Renewable Power Developments (Pty) Ltd.

##### **To:**

Ilikwa PV Facility (Pty) Ltd.

##### **Reason for amendment:**

The abovementioned amendment is approved as the company responsible for the development phase of the authorised solar PV facility has changed to Ilikwa PV Facility (Pty) Ltd).

105.

The following proposed amendments are hereby refused:

**Amendment 2:** Include a description of the switching substation 132kV portion / yard of the shared onsite substation (also known as the Eskom Substation) to the Ilikwa PV Facility.

**Amendment 3:** Include a 300m (length) 132kV distribution line with 100m corridor (50m either side) that will connect the approved substation footprint to an existing Eskom transmission line servitude (via Loop in Loop Out connection) located adjacent to the southern boundary of the subject property.

**Reasons for refusal of Amendment 2 and 3:**

According to the information submitted as part of the application for amendment, a separate Basic Assessment Report (BAR) was submitted for the Electrical Grid (i.e., powerline) Infrastructure and Eskom portion/ Switching Station Portion (hereafter referred to as the "Switching Substation") of the shared onsite substation. The infrastructure is required for evacuation of the power produced by the **approved Ilikwa** PV Facility (14/12/16/3/3/1/2435). However, the EA (14/12/16/3/3/1/2435) was **refused** by the DFFE, with biodiversity concerns cited as a reason (namely that the grid corridor traverses Critical Biodiversity Areas (CBAs) and that no Biodiversity Offset was in place).

Furthermore, as indicated in the application for amendment the shared onsite substation consists of two (2) parts, i.e. IPP Substation (2.5ha in extent) and Switching Station (2.5ha in extent).

Upon review of the EA for the Ilikwa Solar PV Facility, the electrical infrastructure authorised was the 33/132kV on-site IPP Substation (including associated equipment and infrastructure); and underground cabling and overhead power lines (up to 33kV) and did not include the switching station as well as the 300m corridor to the existing Eskom Transmission line.

Therefore, the PV Facility was not authorised with the shared onsite substation/ or Switching Station Portion or half a substation, and the 300m corridor to the existing Eskom Transmission line as indicated by the EAP. The Department disagrees with the view that both components of the substation and the 300m corridor to the existing Eskom Transmission line was approved as part of the Ilikwa Solar PV Facility.

This proposed amendment letter must be read in conjunction with the EA dated on 14 March 2022, as amended.
