Malvern

## **Re: Amendments to Building**

### **Roof:**

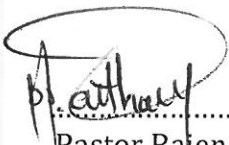

1. The original corrugated sheeting has degenerated through time; water damage has also been one of the contributing factors for replacement.
2. We are a certified NGO and in terms of affordability, the IBR roof sheeting used on the alterations for the above mention site was most affordable.
3. We also took consensus of our neighboring sites and this was the common material used on most of the surrounding homes.

### **Floor:**

1. The timber flooring was severely infected by wood borer.
2. Considering our purpose for building, the safety of our men, women and children was our primary focus.
3. The integrity of the original flooring was questionable in respect to safety.
4. The floors were therefore filled according to the specific construction standards.
5. Damp course standards were used to prevent moisture.

I thank you for your consideration.
