

Appendix 4: Specialist Reports

Over and above the various heritage management plans and documents compiled for the Taung Skull site (refer to Appendix 7), and its various supporting specialist studies, the following specialist inputs were commissioned under this HIA:

1. Status Quo Report for the Taung Skull WHS compiled in February 2015.
2. Visual Landscape Report compiled in March 2015 provides a visual baseline of the Taung Skull WHS landscape, which requires management and protection.
3. Built Landscape Inventory on selected buildings noting the status quo on the built landscape, as produced in February 2015.
4. Archaeological input on general archeological impacts of various project components, as well making recommendations on heritage conservation measures and visitor management measures proposed.
5. Paleontological input on general paleontological impacts of various project components, as well making recommendations on heritage conservation measures and visitor management measures proposed.
6. Dr Otsile Ntsoane has contributed in a review capacity.
