**Report on the archaeological status of ERF 38252 (portion of Erf 23218)  
Bellville, to satisfy the requirements of an application to rezone**

Erf 38252 (portion of Erf 23218) lies next to Adam Tas Avenue in Erica Township, Extension No. 13, City of Cape Town. The ground of the erf is heavily disturbed with building rubble, plastic, recent porcelain and glass mixed into the surface layer. A thick cover of alien grass obscures most of the surface, except in the eroded length of a footpath that crosses the property. Inspection of the footpath as well as numerous dune mole rat mounds did not detect any significant archaeological materials. In my professional opinion, development of this property will not have an impact on archaeological remains and no further mitigation is needed.
