Dear Mr Joubert

ARCHAEOLOGICAL INVESTIGATION OF TWO SITES IN THE ACORNHOEK AREA.

As requested, we have investigated the two sites that are considered as possible refuse dumps in the Acornhoek area of Northern Province:

Site 1. On the farm Greenvalley 213KU, centring around the coordinates S 24°35'01"; E 31°02'29". Although natural vegetation occurs on this site, it seems as if it was used as agricultural fields at some time in the past. This is based on the contouring that was identified on the site.

Site 2. On the farm Islington 219KU, centring around the coordinates S 24°38'43"; E 31°17'19". The whole of this area is currently planted with sisal.

No sites, features or artifacts of cultural significance were identified on any of these sites and it is recommended that development can continue. However, it should be kept in mind that archaeological sites tend to occur below the ground. If, during construction, anything is opened up, this should be reported in order that it can be investigated further.

Yours sincerely
