Dear Mr Hutcheons

**HERITAGE IMPACT ASSESSMENT: PROPOSED TOWNSHIP LASER PARK EXT 30**

As requested, we have investigated holding 12 Kimbult of portion 470 of the farm Wilgespruit 1901Q. The site is located some distance west of the R564 and south Beyers Naude Avenue in the Roodepoort area of Gauteng (Fig. 1).

The scope of work consisted of conducting a Phase 1 archaeological survey of the site in accordance with the requirements of Section 38(3) of the National Heritage Resources Act (Act 25 of 1999). This included:

- Conducting a desk-top investigation of the area;
- A visit to the proposed development site.

The objectives were to

- Identify possible archaeological, cultural and historic sites within the proposed development areas;
- Evaluate the potential impacts of construction, operation and maintenance of the proposed development on archaeological, cultural and historical resources;
- Recommend mitigation measures to ameliorate any negative impacts on areas of archaeological, cultural or historical importance.

The geology is made up of granite and the original vegetation is classified as Rocky Highveld Grassland. The latter, however, has undergone some changes due to urbanization and agricultural activities that took place on the site in the past. No other features (e.g. hills, streams or rock shelters) that usually drew people to settle in its vicinity, occurs in the study area.

No sites, features or objects of cultural significance were found in the surveyed area, and we therefore recommend, from a heritage point of view, that the proposed development can continue. However, we request that if archaeological sites or graves are exposed during construction work, it should immediately

**NORTHERN FLAGSHIP INSTITUTION/NOORDELIKE VLAGSKIPINSTELLING**
