CULTURAL HERITAGE RESOURCES IMPACT ASSESSMENT ON THE FARM KOEDOESFONTEIN 324 K.Q. THABAZIMBI

1. DEFINITION

The broad generic term *Cultural Heritage Resources* refers to any physical and spiritual property associated with past and present human use or occupation of the environment, cultural activities and history. The term includes sites, structures, places, natural features and material of palaeontological, archaeological, historical, aesthetic, scientific, architectural, religious, symbolic or traditional importance to specific individuals or groups, traditional systems of cultural practice, belief or social interaction.

2. PROTECTED SITES IN TERMS OF THE NATIONAL HERITAGE ACT, Act. NO. 25 OF 1999

The following are the most important sites and objects protected by the National Heritage Act:

- a. Structures or parts of structures older than 60 years
- b. Archaeological sites and objects
- c. Palaeontological sites
- d. Meteorites
- e. Ship wrecks
- f. Burial grounds
- g. Graves of victims of conflict
- h. Public monuments and memorials

- i. Structures, places and objects protected through the publication of notices in the Gazette and Provincial Gazette
- j. Any other places or object which are considered to be of interest or of historical or cultural significance
- k. Geological sites of scientific or cultural importance
- l. Sites of significance relating to the history of slavery in South Africa
- m. Objects to which oral traditions are attached
- n. Sites of cultural significance or other value to a community or pattern of South African history

3. METHODOLOGY

All relevant maps and documents on the site were studied. The site was visited and visually inspected.

4. RESULTS

The farm is covered by dense vegetation, which makes the finding of archaeological sites extremely difficult. The farm lies in a flat area away from mountains. This is the type of habitat African people used for hunting and grazing but preferred to live near the foot of the mountains.

No indications of any archaeological or historical important sites could be found on the farm.

5. CONCLUSION

No archaeological or historical sites could be found on the farm.

6. RECOMMENDATIONS

There is no objection from a cultural heritage resources point of view to the proposed development.
