Phase 1 Heritage Resource Impact Assessment (Scoping & Evaluation)
**ABSTRACTION OF GROUNDWATER FOR BULK WATER SUPPLY TO
VAALWATER: WATERBERG DISTRICT MUNICIPALITY
LIMPOPO PROVINCE**

STATEMENT WITH REGARD TO HERITAGE RESOURCES MANAGEMENT

Map reference: 2428AC Vaalwater.

This letter serves to confirm that the surface area of the proposed bulk water supply pipeline project contains no visual significant heritage resources on which the intended construction works could have an adverse impact. Archaeological material is, however, often beneath soil surface and thus remains undetected until disturbed. It is therefore possible that previously undetected cultural remains may be exposed during construction, which must be reported to either the archaeologist or the South African Heritage Resources Agency (SAHRA) in Polokwane.

From a heritage resources management point of view, we have no objection with regard to the proposed development.

Yours faithfully

FRANS ROODT (BA Hons, MA Archaeology, Post Grad Dipl. Museology: UP)
Principal Investigator for: R & R Cultural Resource Consultants
