Attention: Mr. Danie van der Walt

Heritage Scoping – Portion of the farm Witklip 229IR; Delmas.

1. Introduction

Matakoma Heritage Consultants (Pty) Ltd was appointed by Wandima Environmental Consultants to conduct a Heritage Scoping for inclusion in the Environmental Impact Assessment pertaining to the farm Witklip 229IR. The proposed development consists of 29ha of land that was physically surveyed. The study area is situated at Delmas.

2. Methodology

The proposed development area was surveyed on foot by qualified archaeologist. The purpose of this was to identify topographical areas of possible historic and pre-historic activity.

3. Assessment of study area

After a thorough investigation of the study area no visible signs of any Heritage Resources could be detected. No mitigation is therefore required for this aspect. From a heritage perspective there are no reason why the development cannot commence.

It must be noted that although the area was subjected to a thorough Heritage Assessment it is still possible that some heritage resources were not detected. The discovery of previously undetected heritage remains must be immediately reported and might require further mitigation measures.

Any further queries can be forwarded to Jaco van der Walt on Cell: +27 82 373 8491 or to jaco@matakoma.co.za.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jaco van der Walt', with a stylized, cursive script.
