

**The archaeological survey of the Zithulele Mission Hospital
Road Upgrade (DR08323).**

For Buk'Indalo Consultancy cc

Date: 2 March 2004

Umlando: Archaeological Tourism and Resource Management

INTRODUCTION

Buk'Indalo Consultancy contracted Umlando to undertake an archaeological survey of the proposed Zithulele Mission Hospital Road Upgrade (DR08323). The road occurs near Coffee Bay in the Eastern Cape.

No archaeological sites were recorded along road, nor at the proposed borrow pits and quarries.

A recent dwelling occurs at Borrow Pit 10. There may be graves in association with this dwelling. This does not fall under the archaeological terms of reference and a social impact assessment should be undertaken.

Many of the borrow pits occur in shale formations. A palaeontological analyses should be undertaken to determine if these formations are of any significance.
