To whom it may concern

Development of PV Power Station at Herbert near Douglas, Northern Cape.

The author of this letter has undertaken two Phase 1 Archaeological Impact Assessments at Herbert, namely:

Morris, D. 2010. Archaeological Impact Assessment, Phase 1: Proposed development of PV Power Station at Herbert, near Douglas, Northern Cape. Unpublished report, June 2010.

Morris, D. 2011. Archaeological Impact Assessment Phase 1 (upgraded): Proposed expanded development of PV Power Station at Herbert, near Douglas, Northern Cape. Unpublished report, January 2011.

These surveys are considered to constitute a more than adequate assessment of the possible impacts on archaeological and colonial era heritage by the project now being proposed for the Herbert site.

With respect to archaeology and cultural heritage it is not considered necessary that any mitigation should take place.

Yours faithfully

Dr David Morris
Head of Archaeology
