2. Motivation for proposed work (Summarise below and expand on a separate sheet if necessary)

This facility which is being used as a butchery was damaged by the Civil Unrest in June 2021. The building is a double storey structure. A fire was started on the first floor. This resulted in the roof catching alight as well as damage to internal walls and finishes. The front facade of the building is still relatively intact.
The existing roof which was hidden behind the parapet wall was a heavy timber hipped roof that leaked alot. The roof was extensively damaged. by the fire.
The structural engineer has recommended that we utilise a steel portal framed structure on the first floor for the roof as well as to stabilise the building. The external walls which are of mixed construction are freestanding up to 4m without any piers or bracing. The fire may have caused structural weakness to the wall which are not visible. The roof will be a mono pitch roof that will be hidden behind the parapet wall maintaining the existing architectural design and street view.

3. Detail the alterations/additions/restorations proposed (Briefly outline the proposal)

Front facade - replace fire damaged aluminium windows on the first floor with the same design.
Internal Layout - Replace fire damaged internal walls with new brickwork.
Structural - New Portal Framed Steel structure to brace the existing external walls.
First Floor - New suspended ceiling (600 x 1200 ceiling tiles).
New porcelain tiled floor finish.
Smooth plaster and paint to existing and new internal brickwork.
New Sanitary and Plumbing Fittings
New power & light fittings.
Roof - New Powder Coated Light Grey Zincolume Sheeting on Mono pitch Roof with concealed box gutter.
