Coleskop Infrastructure: Laydown Area Change

To whom it may concern

This is to confirm that the new proposed layout change for the Coleskop infrastructure will not impact on *in situ* archaeological sites and/or artefacts. I have passed this area on several occasions since 2015 whilst undertaking various surveys for the Coleskop WEF. The only heritage resources in this area will be stone tools in a secondary deposit as a result of alluvial deposits.

The location of the old and new area is shown on fig. 1.

Yours sincerely

A handwritten signature in black ink, appearing to read 'G. Anderson'.
