

## Exemption from Phase 1 Heritage Impact Assessment: Curro Zevenfontein Filling Station, Johannesburg, Gauteng Province.

---

Map Ref.: 2527DD Broederstroom

Site Coordinates:

A) 25°59'35.43"S 27°59'0.68"E

B) 25°59'36.73"S 27°59'3.12"E

C) 25°59'41.61"S 27°59'0.12"E

D) 25°59'41.42"S 27°58'59.31"E

Proposed development calls for the construction of a new filling station facility, located on the corner of Cedar and Haven Road near Dainfern in Johannesburg (**Fig. 1**). Development will be conducted in an area that has already been altered by modern activities (**Fig. 2**). An existing tar road is providing access to the site. Potential archaeological impact at the proposed site is considered to be non-existent as a result of the degraded condition of the terrain. Underlying geology at the site consist of palaeontologically insignificant metamorphic rocks capped by Quaternary to Recent residual deposits. The likelihood of palaeontological impact on the residual deposits is considered to be extremely low as a result of the degraded condition of the terrain.

It is recommended that a Phase 1 Heritage Impact Assessment is not required as a prerequisite for the planned development.

Yours truly,

Dr Lloyd Rossouw
