

APPENDIX 2: PHOTOGRAPHIC DOCUMENTATION NKOMAZI ESKOM POWERLINE

Fig. 1: The proposed powerline will start from an existing ESKOM powerline on the hill, approximately 1km south of the tented camp / lodge site.

Fig. 2: A general view of the powerline route (dashes) facing north. The proposed line will start from the top of the hill (south) to the tented camp / lodge below (north - next to the Nkomazi River). The lodge site is indicated by the arrow.

Point KAFS207/1

Fig. 3: Point 1 is the start of the powerline in the south, facing north towards the river and tented camp in the gorge below (north).

Point KAFS207/2

Fig. 4: Point 2 is still fairly flat, but sloping gently towards point 3.

Point KAFS207/3

Fig. 5: Point 3 is west of the main access road (near the site of a demolished water tank).

Point KAFS207/4

Fig. 6: Point 4 is next (west) to the main access road.

Point KAFS207/5

Fig. 7: The area for point 5 was gently sloping north, and fairly open.

Point KAFS207/6

Fig. 8: Point 6 is situated within a natural rocky section.

Point KAFS207/7

Fig. 9: Point 7 is also sloping gently and fairly open and accessible.

Point KAFS207/8

Fig. 10: Point 8 is still situated in a natural rocky area, which is currently covered with grassland and shrubs.

Point KAFS207/9

Fig. 11: Point 9 continues across the main access road towards the lodge.

Point KAFS207/10

Fig. 12: Point 10 is situated on the foot-slope of the hill, within the lodge perimeters.
