

APPENDIX 2: PHOTOGRAPHIC DOCUMENTATION: TEVREDE & ABEK

TEVREDE Section A (Refer to maps in text)

Fig. 1: A general view of the study area: Tevrede section A facing east to west. The area is dense and covered with natural-, as well as invasive vegetation.

Fig. 2: An Eskom power line forms the southern boundary of section A.

Fig. 3: The ESKOM power line was followed to access this dense area.

Fig. 4: The middle section of the study area (section Tevrede A).

Fig. 5: Tevrede section A was overgrown with invasive vegetation which restricted access and visibility.

TEVREDE Section B

Fig. 6: A general view of Tevrede section B, as seen from the north, facing south (see oval). The arrow indicates a small dirt road.

Fig. 7: A general view of Tevrede section B. The stream to the north is roughly indicated by the blue line.

Fig. 8: A general view of the north-western section of Tevrede B.

Fig. 9: The northern boundary of Tevere section B, which runs parallel with the stream.

Fig. 10: The middle section of Tevere B. The area is covered with mainly invasive vegetation.

Fig. 11: The southern section of Tevere B, is located against a slope. Access and visibility in the area were restricted.

Fig. 12: A small pumphouse is located at the stream to the north of the study area.

ABEK Section C (please refer to maps in text)

Fig. 13: The southern tip of the study area. The dirt road forms the eastern boundary of this section (section C).

Fig. 14: Alien invasive species cover most sections of the study area.

Fig. 15: Alien invasive species such a *Lantana camara*, prevented easy access into the study area.

Fig. 16: Fragments of clay potsherds were found in the access road and general area.

Fig. 17: More fragments of clay potsherds.

Fig. 18: Fragments of clay potsherds.

Fig. 19: Clay potsherds within the access road.

Fig. 20: Mr. Elvis Makabela pointed out graves in the vicinity of section C.

Fig. 21: Another indistinct grave in the vicinity of section C.

Fig. 22: An indistinct grave in the vicinity of section C.

ABEK Section D

Fig. 23: The north-eastern section of study area D.

Fig. 24: A general view of the north-eastern section, sloping towards a drainage line.

Fig. 25: The study area could be accessed by existing paths, but vegetation was dense in most sections.

Fig. 26: The western boundary of the study area, section D.

Fig. 27: Another view of the western section. Large trees are also present.

Fig. 28: Some sections in the middle are covered by thick grass as well as alien vegetation and invasive pioneer species, such as Sickle bush.

Fig. 29: The southern section of study area D.
