RE: Case ID 11071 Hazia Filling station.

The applicant, Munghana Leisure and Tourism Pty (Ltd) proposes the development of a filling station with related infrastructure on Portion 24 (a Portion of Portion 5) of the Farm Hazia 240 JP in Zeerust in the Ramothshere Moiloa Local Municipality, North West Province.

Dear Mrs Higgit,

This letter serves as an Amendment to the Addendum and to answer concerns on the Interim Comment of 31/7/2017.

- The depth of the foundations and installation of underground storage tanks will not exceed 3 m and will not intrude into the Time Ball Hill Formation to the north, minimally on the Quaternary,
- Or the Rooihogte Formation below the Time Ball Hill Formation. The Rooihogte Formation does not contain fossils.
- Maps are included in the Addendum.
- The site is 0,3228 hectares and is disturbed by brick works. It is underlain by Diabase of Vaalian age. It is recommended that no further palaeontological studies are required as the development is on the Diabase with a Very Low Palaeontological Sensitivity.

Dr H. Fourie
Palaeontologist
