Dear Mr. Hine

## **RECOMMENDATIONS ON THE EXEMPTION OF THE PROPOSED DEVELOPMENT OF A FILLING STATION ON A REMAINDER OF THE FARM RITA 668 LT, MAAKE, TZANEEN;**

After investigation of the site mentioned below the following recommendations are given regarding the applicability of a full HIA study;

The proposed area for the placement of the filling station falls within the previous area of investigation covered in the 2007 HIA report for the development of the Maake Shopping Plaza and related sewage system. The area under investigation proved to contain no sites of heritage potential and it is believed that this situation has stayed unaltered. It should however be noted that the cultural landscape components of the site was not evaluated as the application of these principals are a recent development in the Limpopo Province. It is however anticipated that the severely damaged area under discussion would not suffer any further negative heritage impacts through the development of the filling station

The previously mentioned recommendations are based on information gathered during physical site visits.

Should you have any questions regarding these recommendations please feel free to contact me.

November 15, 2009

Sincerely,  
Stephan Gaigher
