

**LETTER OF RECOMMENDATION FOR THE EXEMPTION FROM FURTHER
PALAEOLOGICAL STUDIES**

For: PROPOSED DEVELOPMENT AT 24 RIVIERE NEAR VAALWATER,
LIMPOPO

Client: TEKPLAN, P.O.Box 55714, Polokwane 0700

Date: 3 February 2013

Methodology:

The geology of 24 Riviere near Vaalwater, Limpopo Province where development is proposed to take place, has been studied for a scoping report.

Findings:

The geology of the area is dominated by arenaceous rocks of the Waterberg Group which is Mogolian in age (approximately 2 070 to 1 080 Mya). Due to the improbability of fossils occurring in the study area it is recommended that the project should be exempted from further palaeontological studies.

Dr. J.F. Durand (Sci. Nat. Zoological and Earth Sciences, Reg. no. 400095/05)

Specialist:

Dr JF Durand BSc Botany & Zoology (RAU), BSc Zoology (WITS), PhD
Palaeontology (WITS), HED (RAU), Museology Dipl. (UP).
