

PROPOSED UPGRADING OF FRANKFORT SWS WASTE MANAGEMENT LICENSE APPLICATION MINUTES OF THE PUBLIC MEETINGS

MINUTES COMPILED BY LORATO TIGEDI *PR. SCI. NAT.*

COMPILATION DATE: 20/03/2019

- NSVT Consultants** as the independent Environmental Impact Assessment undertaking the Waste Management License Application has been invited by Mafube Local Municipality to do a presentation regarding the municipality's proposed intention to upgrade the existing landfill site in Frankfort. Since we were invited to the public meetings organized by the municipality, the welcoming, opening and introductions were done by councillors of the respective wards. Although, there was no agenda prepared by NSVT, the intent of the municipality was presented to the residents, see presentation attached hereto as **Annexure 1** below and attendance register was circulated, see **Annexure 2** and the photographs that were taken at some of the meetings is shown in **Annexure 3**. The schedule of meetings that were held are indicated in *Table 1* below.

The meetings were held in different wards at different times as shown below.

MEETING	DATE	TIME	WARD	VENUE	PRESENTER
1	11/10/18	17h00	2	Brothern Church	Teboho Modise
2	11/10/18	18h00	5	Outside Frankfort Town Hall	Lorato Tigedi
3	16/10/18	16h00	5	Save Gospel Church	Keagalaletsa Gobolawamang & Rebolang Makwaba
4	16/10/18	17h00	2	Mfundo Secondary School	
5	17/10/18	16h30	6	Apostolic Church	Lorato Tigedi
6	17/10/18	17h00	5	Namahadi Townhall	Tokelo Motheane Mho Ndabambi Lorato Tigedi
7	19/03/2019	17h30	5	Outside the Frankfort Townhall	Keagalaletsa Gobolawamang & Tshire Mandisa

There was only one meeting that was arranged by the municipality but didn't go as planned, however, we went ahead with it because we had already sent invited to the registered Interested & Affected Parties and the meeting was held outside the townhall. For the meeting that was arranged for Ward 7 on the 18th of October 2018 as Dipabala NSVT JV couldn't attend because it was short notice, the Ward 7 residents were informed by Mme Zandi Mofokeng and she indicated that there were no objections to the proposed upgrading.

2. QUESTIONS AND ANSWERS

QUESTIONS/COMMENTS	RESPONSES
MEETING 1	
No comments, issues or objections were raised.	
MEETING 2	
Please consider relocating the landfill site to the North of Namahadi next to Paisley Farm because it is out of sight, close to recyclers who most of them stay in Namahadi.	The area north of Namahadi has been earmarked for human settlement.
Close the existing landfill site and rehabilitate it because Wilge Marathon runs past the site and every year the athletes complain about its aesthetics and foul smell. Wilge marathon is a Comrades Qualifier and a big attraction in Frankfort, which is growing yearly and has the potential to host more than 100 athletes. The marathon started with only 20 athletes.	The consideration for closure will be communicated with Municipal Infrastructure Support Grant (MISA) as the implementing agent and Mafube Local Municipality as the Applicant.
The existing landfill must be closed, and an alternative land use be determined, e.g. natural amphitheatre or any land use that will use its natural look.	Mafube Local Municipality will be advised to consider a change in land use option for the existing solid waste site instead of upgrading.
There is no adequate cover material, thus cannot be upgraded.	The option for importing cover material will be investigated, as the current site doesn't have adequate cover.
Acid from the landfill site is seeping onto the river.	Leachate control system will be in place as part of the upgrading.
It is difficult to access the landfill site with a big truck, it can't make a U-turn.	This issue will be considered during the design of the internal road network.
The existing landfill site is located further from Namahadi, therefore recycling potential is limited.	As recycling facility will form part of the proposed upgrading, distance from the waste source and the recyclers will be considered,
<p>All identified alternatives are not suitable for development of a landfill site: Preferred Alternative-Upgrading of the existing landfill site and it's near to Wilge River</p> <p>Alternative 1 - Adjacent to the Golf course, thus impacting negatively on the use of the golf course and wind is blowing easterly therefore during burning smog hangs over it.</p>	We will inform the municipality and assist with identification of alternative site.

Alternative 2 (Along R26)– Near the shooting range and it's also near Wilge River.	
MEETING 3	
The proposed solid waste site must be located far from the Namahadi community because it may ruin the visual aesthetic of our community.	Currently the existing landfill site, which is propose for the upgrading is located further from Namahadi.
If the solid waste site cannot be relocated, we then suggest it remains where it is currently located.	The preferred option by the municipality is to upgrade the existing, however, if it's not feasible then a new site will have to be identified.
We would like to request that a solid waste site management programme be provided to us once the solid waste site is constructed, because currently solid waste is not being adequately managed in the Namahadi community.	The request will be escalated to the municipality.
MEETING 4	
We need the proposed solid waste site to adhere to environmental legislation and acquire an Environmental Authorisation prior to construction.	As independent Environmental Assessment Practitioners, we will ensure that the process undertaken adheres to the environmental legislation, to enable the competent authority, i.e. DESTEA to make an informed decision regarding the application.
Once the construction is completed and the solid waste site is operational, we need a register of who goes in and out of the solid waste site as to determine if the operation of the site is adequately managed by the correct individuals.	An operation and maintenance plan will be compiled for the landfill site and the condition of a register will be included in the register.
MEETING 5	
There are illegal dumping sites everywhere therefore we need the landfill site to be licensed then implement operation clean-up and have notice boards indicating that illegal dumping is not allowed.	Awareness for the curbing of illegal dumping sites will assist in maintaining the town clean and aesthetically pleasing.
The landfill site is far away from the community and all it needs is to be fenced and ponding to be addressed.	The landfill site will be fenced, and a system will be in place to prevent any ponding.
The landfill site needs to be closer as there are women working there, therefore it is not safe. If it is closer to the golf course, then it will be much safer.	Safety is one of the issues that are considered when choosing a suitable location for a landfill site. We have received objections for the area adjacent to the golf course, therefore, the site will not be considered further in the assessment.
The exiting landfill site has impacted on the waterpark, which is always filled with litter, therefore it needs to be relocated.	Should a suitable location be identified, then relocation will be investigated further.

<p>It will be better if the landfill site is relocated because it is located to close to the cemetery and the river, maybe the site next to the shooting range can be considered.</p>	<p>Objections to relocate to the area near the shooting range has been received as it is an entry point into down therefore, a landfill site is not a suitable land use as it is not aesthetically pleasing due to foul smell and windblown litter.</p>
<p>Illegal dumping site should be cleaned up, e.g. the one near fish and chips. The municipality is busy with waste management by-laws, which will prohibit illegal dumping, nuisance. Currently, it is proposed that anyone who dumps illegally, will be fined R1000 and the whistle-blower will get R300. There are no illegal dumping sites in town because the residents are responsible and don't dump waste on illegal sites. If your dust-bin is full, inform the municipality. The waste should be placed outside the yard because the waste collectors aren't supposed to enter the yards during waste collection. The refuse collection schedule will be communicated to the residents once finalised.</p>	<p>This was to notify the community of the illegal dumping situation in the area. Therefore, the comment is noted.</p>
<p>If the landfill sites where it's currently located is affecting the wellbeing of other people, then it should be relocated.</p>	<p>As the EAP, we must ensure that no-one's environmental right will be infringed by the location of the landfill site.</p>
<p>If the area occupied by the landfill site can be turned into an economic, then it needs to be explored.</p>	<p>Should a suitable land be identified during the process and a landfill is relocated successfully, then the municipality should explore a change in land use that will boost the local economy.</p>
MEETING 6	
<p>Will people be allowed to get into the landfill site and take material for recycling?</p>	<p>Yes, there will be a recycling facility, and the municipality will be responsible for the management thereof.</p>
<p>Where is the landfill located?</p>	<p>The existing landfill site is located on the right-hand side after crossing the Wilge River from Tweeling/Heilbron road</p>
<p>What type of proof of work experience or training experience will be provided for workers?</p>	<p>The municipality through their communication channels will provide more information.</p>
MEETING 6	
<p>Due to the poor turnout, it was decided that the draft reports be sent through for reviewing and the meeting was adjourned.</p>	

3. WAY FORWARD

It is evident that the community members are divided when it comes to the upgrading of the existing landfill site with different reasons. However, the municipality have indicated that their preferred option is to upgrade the existing one as they have land availability challenges and the land that was proposed during meeting 1 has been earmarked for human settlement development. Therefore, specialists' studies to determine if the upgrading of the existing landfill site is feasible will be undertaken and a report will be placed at the library and sent to the registered I&APs for review before submission to DESTEA for further review and obtain a decision.

ANNEXURE 1

COPY OF PRESENTATION SLIDES

PROPOSED DEVELOPMENT OF AN EXISTING SOLID WASTE SITE IN FRANKFORT, MAFUBE LOCAL MUNICIPALITY

INFORMATION SHARING SESSION

NSVT ENVIRONMENTAL CONSULTANTS

- NSVT provides environmental services that provide engineers/developer with the necessary processes to obtain authorisations from the Department of Environmental Affairs in order to develop needed infrastructure in South Africa.
- Frankfort is in dire need on a new Solid Waste Site (SWS).
- Waste management Licence

PURPOSE OF CONSULTATION

- To introduce the project to the potential Interested and Affected Parties (I&APs)
- To provide an opportunity for I&APs to obtain information about the proposed project
- To provide an opportunity for the I&APs to comment, raise issues relevant to the proposed project.

PROJECT DESCRIPTION

- Mafube Local Municipality has identified the need to apply for a waste management license for the proposed SWS.
- Three sites were identified around Frankfort.

PROPOSED LOCATION

CONSULTANTS
NSVT

PREFERRED LOCATION

- Situated in proximity of the Eskom powerline, golf grounds and Wilger river is where the preferred SWS is expected to be.
- The upgraded SWS will be lined to avoid any groundwater contamination.
- The upgraded SWS will house a recycling building to reduce litter produced by the community.
- The preferred site is farther away from the community unlike the old SWS.

CONSULTANTS
NSVT
ENVIRONMENTAL & SOCIAL SCIENTISTS

SPECIALIST STUDIES

- Ecological Specialist Study.
- Heritage Impact Assessment.
- Geohydrological Investigation.
- Geotechnical Investigation.

BENEFICIATION OF THE NEW SWS

- During construction, local labourers will acquire skills from the construction of the SWS.
- Due to adequate fencing, there will be no wind blown litter in or around Frankfort.
- Youth in the town will be educated about environmental awareness and why it is important to preserve the natural environment within which we live.
