@@

Section 38 of the National Heritage Resources Act requires that any person who intends to undertake certain categories of development in the Northern Cape (see Part 1) must notify Heritage Northern Cape at the very earliest stage of initiating such a development and must furnish details of the location, nature and extent of the proposed development.

This form is designed to assist the developer to provide the necessary information to enable Heritage Western Cape to decide whether a Heritage Impact Assessment will be required.

It may be completed as part of the EIA process to assist in establishing the requirements of Heritage Northern Cape with respect to the EIA.

1. It is recommended that the form be completed by a professional familiar with heritage conservation issues.
2. The completion of Section 7 by heritage specialists is not mandatory, but is recommended in order to expedite decision-making at notification stage.
3. Section 7.1 must be completed by a professional archaeologist or palaeontologist.
4. Section 7.2 must be completed by a professional heritage practitioner with skills and experience appropriate to the nature of the property and the development proposals.
5. Should Section 7 be completed, each page of the form must be signed by the archaeologist/palaeontologist and heritage practitioner

The affected portion of the site contains no structures older than 60 years, no structures of heritage significance, and the immediate landscape does not illustrate links to historic landscape patterns of significance. There is no direct significant association with an historic person, group or event.</li> <li>- Given the history of the area, the disturbed nature of the site, and the lack of 'triggers' to suggest the possible presence of archaeological material of significance, it is suggested that an Archaeological Scoping report is not necessary.</li> </ul> <p>The heritage resources in this region include:</p> <ul style="list-style-type: none"> <li>- The 1685 mining shaft where copper was discovered. This shaft is a proclaimed heritage resource together with smelting furnace built by the Cape Copper Mining Company in 1866.
