

Existing poweline running close to the boundary of the site

33kv powerline running close to the site boundary

Boundary of the Taung Skull site

View of the site and boundary of the site including existing powerline

Village roads within the site buffer zone

One of the three houses to be electrified, the houses are approximately 300m from the site boundary

Second house to be electrified, note that the servitude for the MV and LV line is already disturbed

One of the several village roads within the buffer zone of the Taung Skull site

One of the several village roads in the buffer zone of the site

Previously cleared area near powerline route

View of Norlin substation where the proposed powerline will T.OFF

View of existing 22kv powerline running near the site boundary

Norlin Substation

Existing powerline, the proposed powerline will run parallel to the existing line on the right

The Norlin Dikhuting powerline will run on the left of the existing line

Existing line , the proposed line will run to the east along the existing powerline

Clear view of the powerline servitude from the substation

View of Norlin substation where the proposed lines will T-off from

Norlin Substation where the proposed powerlines will T-off

A clearer view of proposed powerline. Note that the entire project area is heavily disturbed from previous mining activities, mine residential area and encroaching

Panoramic view of powerline route running along existing powerline servitude

Powerline route cutting through open grazing land with no features to absorb the visual impact of the proposed line

Powerline route along open grazing land with little or no features to absorb visual impact of the proposed powerline

Powerline route along road servitude

Powerline route along grazing land

Powerline rout along existing 132kv powerline route

Powerline route

Powerline route cutting through such landscape

Proposed powerline route cutting through grazing land
