My ref.: c:\report\ngwadini.doc

Your ref.:

Dear Shaun

I completed the archaeological survey for the Ngwadini Dam on Saturday, 8 March 1997.

I did not record any archaeological sites in the affected area. The only artefacts we observed were a few Middle Stone Age stone tools. These tools are common in KwaZulu-Natal.

In terms of the archaeological significance, this area has low archaeological significance.

Please use this fax as a 'report'.

Yours sincerely

Gavin Anderson
