

## RDR 1 Photos

### RDR 1 C

Photo 45: The entire area surrounding RDR 1 C is level with the ground surface. Road networks have previously impacted on the remains of the stone walls.

Photo 46: An upper grinder observed in RDR 1 C.

Photo 47: The condition of the walls is visible in this picture.

Photo 58: Some of the units can be identified when the velt was burnt.

Photo 49: Impacts from previous road networks are visible in the area of RDR 1 C.

#### **RDR 1 D & E**

Photo 50: The stone walls from D, E and F are interlinked. Some sections of the walls are on the ground surface, whereas the foundation stones of others are clearly visible (see layout plan Fig. 5).

Photo 51: The stone walled complex in section RDR 1 D & E.

**RDR 1 F**

Photo 52: A small natural outcrop forms part of the stone walled complex at section RDR 1 F.

Photo 53: The condition of the walls are visible in this picture.

Photo 54: Some of the sections are in the region of 600mm high.

Photo 55: Some of the walls are in the region of 1000mm wide.

Photo 56: The stone foundations are distinctly larger stones in this section.

Photo 57: Detail of some of the large foundations stones.

#### **RDR 1 G**

Photo 58: RDR1 G has been impacted upon by the tarred road (R36) which cuts through this unit. The walls are not generally in good condition.

Photo 59: Detail of the walls in RDR 1 G.

Photo 60: A section of the wall in RDR 1 G that is still in a good condition.

Photo 61: An upright stone which used to be part of an entrance.

#### **RDR 1 I**

Photo 62: RDR 1 I is the best preserved of all the stone walls in the RDR 1 group. It is situated on a small hill and distinct (see layout plan in Fig. 5).

Photo 63: RDR 1 I in the background (arrow). The stones in the foreground are scattered throughout the hill area and used to be part of the larger stone walled complex.

Photo 64: The condition of some of the walls in RDR 1 I.

Photo 65: This specific circular wall is still in a very good condition.

Photo 66: Upright stones mark the entrances in this unit.

Photo 67: The entrance section of RDR 1 I as it is reach from the bottom of the hill.

Photo 68: View from RDR 1 I from below the hill.

Photo 69: Large foundation stones are also distinct in this section.

Photo 70: A lower grinder was observed in one of the units.

Photo 71: A stone for sharpening implements was observed in one of the units.

Photo 72: An upper grinder was observed near the entrance of the complex.

Photo 73: A neat entrance to one of the units is still visible.

### RDR 1 J

Photo 74: RDR 1 J is situated on the slope of the hill. It is characterised by large stones which were incorporated into the units.

Photo 75: Upright stones mark the entrances of the units.

Photo 76: A view of RDR 1 J after the velt was burnt.

Photo 77: A view of RDR1 J. The walls are distinct but not in a good condition.

Photo 78: One particular neat section of a wall in RDR 1 J.

Photo 79: The extent of the walls in RDR 1 J is visible in this picture.

Photo 80: An upper grinder was observed at the foot of RDR1 J.

Photo 81: RDR 1 J as viewed from below. The road networks have already impacted upon the stone walls.

Photo 82: A small circular unit below the slope is also associated with RDR 1 I & J.

The section on the hill above RDR 1 I, J & K is associated with sections I & J and K.

Photo 83: The larger foundation stones are mainly visible with most of the smaller stones scattered throughout the area.

Photo 84: The large foundation stones are clearly visible against the background of new growth, which obscures the smaller stones as seen in Photo 83.

**RDR 1 K**

Photo 85: Some of the walls of RDR 1 K, on top of the hill, are still visible. The entire section at the bottom is already destroyed.

Photo 86: RDR 1 K.

Photo 87: RDR 1 J & K are destroyed in this section.

Photo 88: A water reservoir was built on the bottom section of RDR 1 K.
