

1852	S31 18 11.4 E26 17 14.4	A 4 m long section of stone walling located on a ridge and facing towards the east. Related to ABW.	Medium / GPA
1853	S31 18 11.9 E26 17 14.3	A 4 m long arc-shaped stone wall located on a ridge and facing towards the east. Related to ABW.	Medium / GPA

1854	S31 18 12.4 E26 17 14.0	A 30 m long stone wall runs along the ridge here and faces towards the southeast. Related to ABW.	Medium / GPA
1855	S31 18 13.1 E26 17 13.2		

1856	S31 18 13.4 E26 17 13.1	This 2 m long stone wall lies on a ridge and faces towards the southeast. Related to ABW.	Medium / GPA
------	----------------------------	---	--------------

1857	S31 18 13.5 E26 17 12.8	This 15 m long stone wall lies on a ridge and faces towards the south. Related to ABW.	Medium / GPA
			
1858	S31 18 12.3 E26 17 11.7	This very small section of wall is about 1 m long. It lies adjacent to a boulder and faces towards the southeast. Related to ABW.	Medium / GPA

1859	S31 18 11.8 E26 17 11.9	This 2 m long stone wall lies on a ridge and faces towards the southeast. It is built on top of a natural outcrop. Related to ABW.	Medium / GPA
1860	S31 18 11.8 E26 17 12.1	This 5 m long stone wall lies on a ridge and faces towards the southeast. Related to ABW.	Medium / GPA

1861	S31 18 14.5 E26 17 07.5	This 3 m long stone wall lies on a ridge and faces towards the southeast. Related to ABW.	Medium / GPA
------	----------------------------	---	--------------

1862	S31 18 14.7 E26 17 07.2	This 1 m long stone wall lies on a ridge and faces towards the south. It is built on a small natural rock outcrop. Related to ABW.	Medium / GPA
------	----------------------------	--	--------------

1863	S31 18 15.1 E26 17 06.8	A 4 m long arc-shaped wall has been built in front of a small rock shelter just below the ridge. Given its location, it is assumed to relate to the ABW. It faces towards the southeast.	Medium / GPA
			
1864	S31 18 15.2 E26 17 06.3	This rock shelter lies just below the ridge and contains some collapsed walling in one part and an arc-shaped wall in another part. Given the location, this walling is assumed to relate to the ABW. There is also rock art on the rear wall. The paintings are poorly preserved but seem to be largely human figures (scales in cm). There are also many LSA hornfels flaked stone artefacts in front of the shelter.	High / IIIA

1865	S31 18 15.3 E26 17 04.8	This 2 m long tone wall lies along a ridge and faces towards the south. Related to ABW.	Medium / GPA
------	----------------------------	---	--------------

1866	S31 18 14.8 E26 17 04.0	This 18 m long stone wall lies along a ridge and faces towards the south. Related to ABW.	Medium / GPA
			
1867	S31 18 16.7 E26 17 03.1	This is a 7 m by 7 m stone-walled enclosure located just off the ridge. It seems most likely to relate to herders using this ridge.	Low / GPB
			
1868	S31 18 17.1 E26 17 03.4	A light scatter of LSA artefacts on hornfels were seen on the slope just below the summit ridge of this hill.	Very low / GPC
No photograph.			
1869	S31 18 17.7 E26 17 03.5	A small indeterminate stone feature likely related to those at waypoints 1867 and 1870.	Very low / GPC

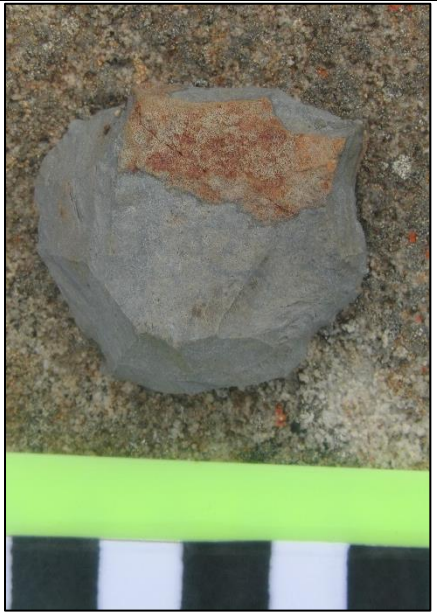

1870	S31 18 18.1 E26 17 02.7	A stone-walled enclosure measuring 13 m by 9 m and located on a level area below the ridge. It is likely a kraal. Some fragments of glass were seen in the area.	Low / GPB
------	----------------------------	--	-----------

1871	S31 18 16.5 E26 17 02.2	This is a very small rock shelter with a tiny section of stone-walling in it. Given the location, this could easily be related to the ABW.	Very low / GPC
------	----------------------------	--	----------------

1872	S31 18 17.2 E26 16 59.3	This is a dense scatter of LSA artefacts on hornfels located on the very summit of the hill. Scales in cm.	Low / GPB
------	----------------------------	--	-----------

1874	S31 16 33.6 E26 15 04.4	This stone-walled structure measures 2 m by 3 m and has an opening towards the east. It is likely a herder's house. It is located on the upper edge of a low cliff.	Low / GPB
------	----------------------------	---	-----------

1875	S31 16 33.4 E26 15 04.0	This is a rock shelter with a short section of stone walling in it.	Low / GPB
------	----------------------------	---	-----------

1876	S31 16 34.5 E26 15 03.0	This is a rock shelter with a 6 m long section of stone walling in it.	Low / GPB
------	----------------------------	--	-----------

1877	S31 16 18.9 E26 15 25.4	This is a stone house ruin built with dressed sandstone blocks. It has largely collapsed and it is	Medium / GPA
------	----------------------------	--	--------------

		likely that rocks have been removed for use elsewhere. Some 19 th and 20 th century glass and ceramics and fragments of metal are lying on the ground nearby but no dump was seen.	
--	--	--	--

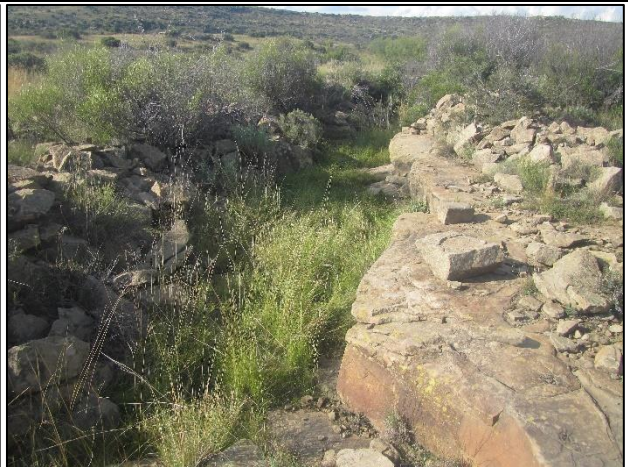

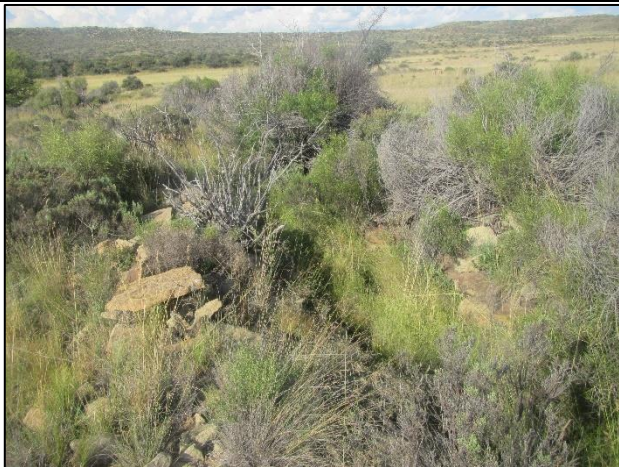

1878	S31 16 10.7 E26 15 23.3	This is an example of an old, abandoned agrarian landscape with Cyprus trees and fruit trees growing along a river. There are 19 th century ruins nearby to the south.	Low
------	----------------------------	---	-----

1879	S31 16 10.5 E26 15 27.1	This stone feature is built across a large erosion gully and appears to have been a road bridge. It is now surrounded by grey poplar trees. There is a vague road alignment visible on aerial photography running from northwest to southeast (waypoints 1877 and 904).	Medium / GPA
------	----------------------------	---	--------------

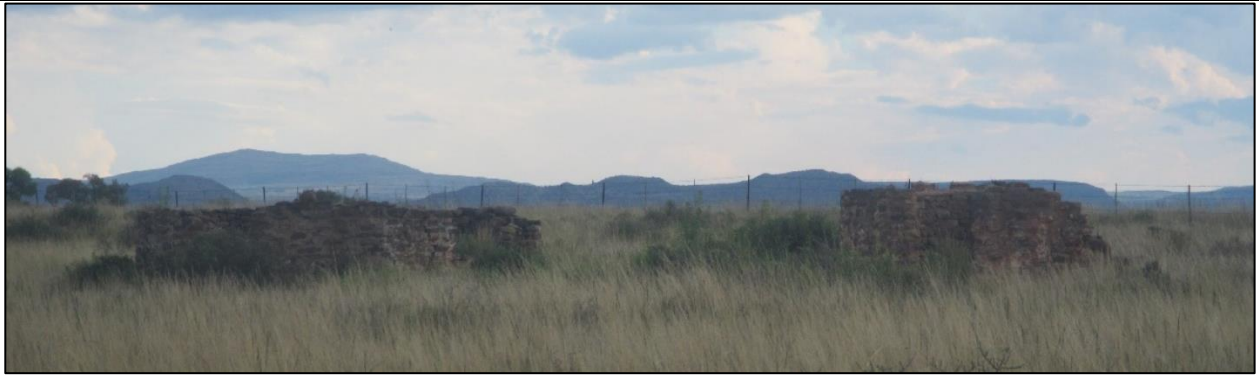

1880	S31 16 13.4 E26 15 29.9	An irrigation furrow has been cut into bedrock to lead water towards a field.	Low
------	----------------------------	---	-----

1881	S31 14 53.8 E26 13 44.7	This farm complex contains various elements of heritage including some likely 19 th century buildings, a traditional rondawel, a tree-line access road, and a likely early-mid-20 th century house (this house pre-dates the 1945 aerial photograph). Aerial photography shows that the isolated house 1 km southwest of the farmstead was built between 1945 and 1959. Several additional structures have been added to the werf after 1959.	High
------	----------------------------	---	------

1882	S31 14 19.5 E26 13 25.4	This is an old stone-walled dam.	Low
No photograph.			
1883	S31 14 44.0 E26 13 48.9	Three ruined buildings were seen here but were not examined in detail. Two seem from aerial photography to be the remains of rondawels.	Medium / GPA

1884	S31 14 48.0 E26 13 51.4	Two rondawels built of stone and white-washed occurred behind the farm complex at waypoint 1881 and were probably workers dwellings in the past. They have thatch roofs. One has started collapsing. They are not obviously visible on the 1945 aerial photography but may still have been present. The newer rectangular houses are definitely younger than 1945.	Low
------	----------------------------	--	-----

1885	S31 17 33.6 E26 14 25.3	Ruined buildings were seen on both sides of the road here but were not examined in detail.	Medium / GPA
------	----------------------------	--	--------------

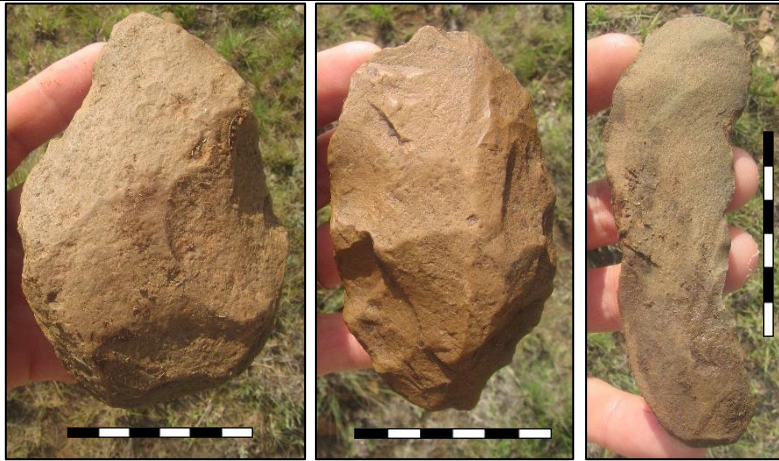

1886	S31 17 36.0 E26 14 22.3	A railway bridge that has a concrete deck over stone walls and pillars.	High
------	----------------------------	---	------

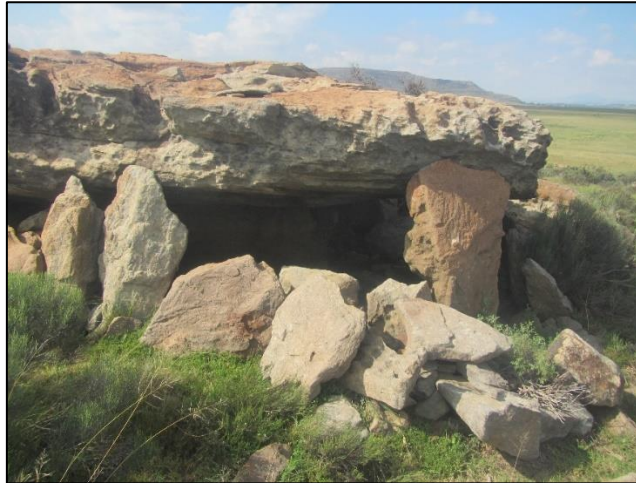

1887	S31 17 35.9 E26 14 16.1	A large stone-built ruin close to the old Bamboes railway station. It was not examined in detail. It might well be related to the railway station and has been graded accordingly.	High / IIIB
------	----------------------------	--	-------------

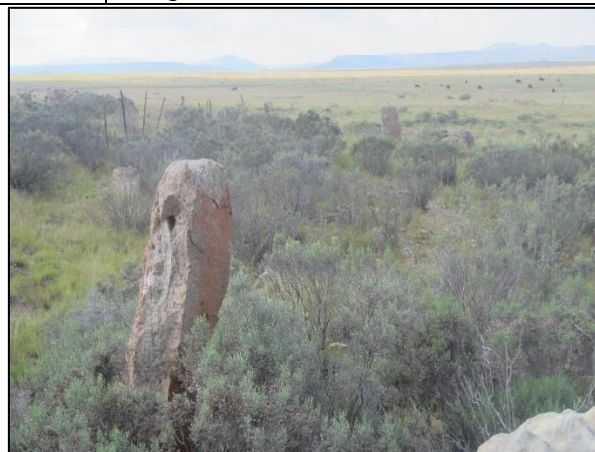

1888	S31 17 36.7 E26 14 15.9	This is the remains of the Bamboes railway station. A large tree in the middle of the railway shows that it has been disused for some time already.	Medium / GPA
			
1889	S31 20 36.6 E26 22 11.5	A fairly widespread but low density MSA scatter was located across the crest of a grassy hill. Waypoint 1890 is part of the same scatter.	Low / GPB
			
1890	S31 20 37.9 E26 22 09.5	Another part of the MSA scatter described under waypoint 1879. Two small bifaces and a large blade were seen in this area (scales in cm). The bifaces could relate the so-called Fauresmith period which occurs at the very beginning of the MSA.	Low / GPB

1891	S31 20 41.7 E26 21 57.8	This is a rock shelter which has been walled by standing slabs of rock on end. Some of them have fallen over. The enclosed space is about 5 m by 2 m.	Low / GPB
------	----------------------------	---	-----------

1892	S31 20 43.2 E26 21 56.0	This is one of a line of standing stones that lie along an old fence line.	Low / GPB
------	----------------------------	--	-----------

1893	S31 20 43.1 E26 21 55.6	A number of rocks have been placed in a row in this location among some boulders but their function is not obviously evident.	Very low / GPC
			
1894	S31 20 45.1 E26 21 51.3	This is a long dam wall which has been breached. It must have breached a long time ago because the natural vegetation has recovered over most of the area behind the wall.	Low / GPB
			
1895	S31 20 41.7 E26 21 47.7	This is a point along the northern side of a walled field. Waypoint 1899 lies on the opposite side.	Low / GPB
			
1896	S31 20 40.3 E26 21 47.5	A stone and mud mortar circular structure with a door opening facing towards the east.	Low / GPB

1897	S31 20 39.6 E26 21 47.3	This is a rectangular ruin of 3 m by 7 m and built with stones and mud mortar.	Low / GPB
			
1898	S31 20 39.1 E26 21 47.2	This was an indeterminate small stone feature.	Very low / GPC
No photograph.			
1899	S31 20 41.0 E26 21 40.7	This is a point along the southern side of a walled field. Waypoint 1895 lies on the opposite side. The walling is far less well-preserved in this location than is the case at waypoint 1895.	Low / GPB

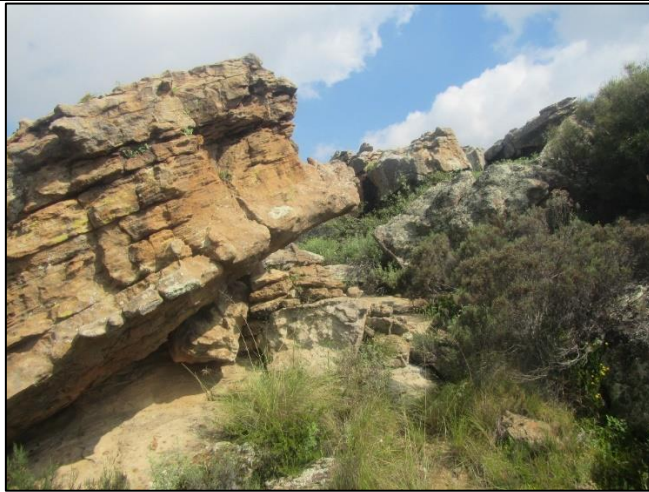

1900	S31 20 39.2 E26 21 33.3	This is a historical fence line that makes use of elongated stone slabs for fence poles. They remain in use.	Low
------	----------------------------	--	-----

1901	S31 20 56.5 E26 21 04.2	This small rock shelter has a short section of stone walling in it. There is also a light scattering of LSA stone artefacts in hornfels on the talus slope of the shelter.	Very low / GPC
------	----------------------------	--	----------------

1902	S31 20 58.4 E26 21 02.6	A small rock shelter with a few stones packed on top of a boulder under the overhang to increase the shelter afforded by the boulder. A few pieces of green glass were found here.	Very low / GPC
------	----------------------------	--	----------------

1903	S31 20 56.8 E26 20 43.6	A small rock shelter with a section of walling inside it that would have enclosed a space about 2 m across.	Very low / GPC
------	----------------------------	---	----------------

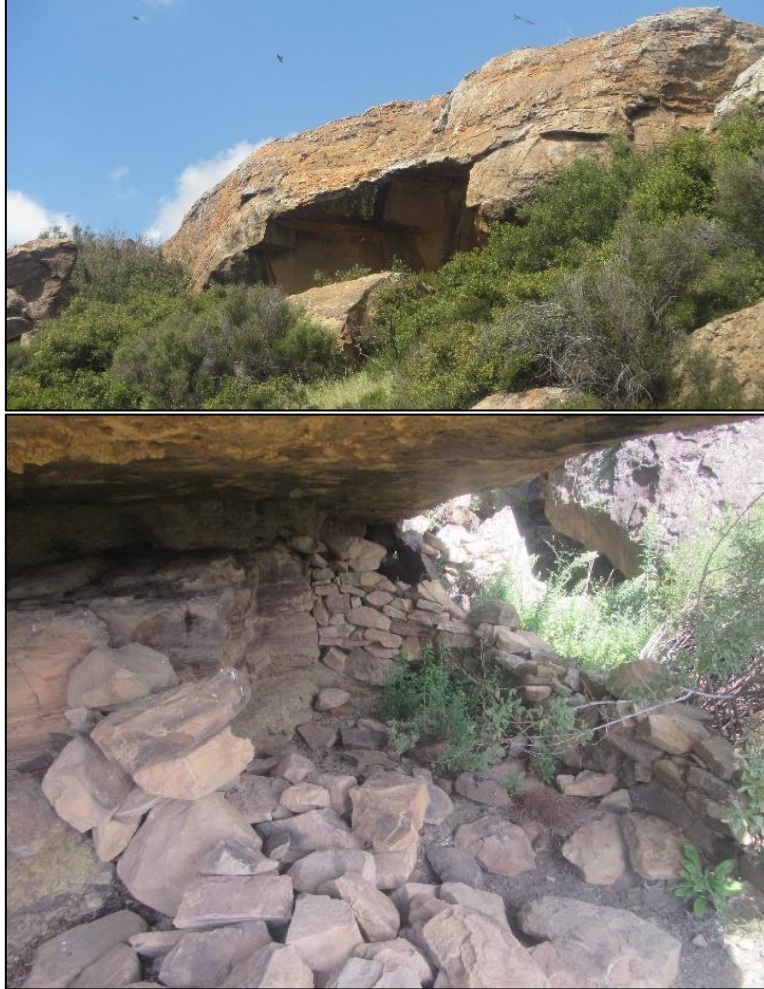

1904	S31 20 30.3 E26 20 44.5	An isolated standing stone slab which seems very unlikely to be a grave given its location on a slope. No evidence for a fence line was seen but this remains the most likely interpretation.	Very low / GPC
------	----------------------------	---	----------------

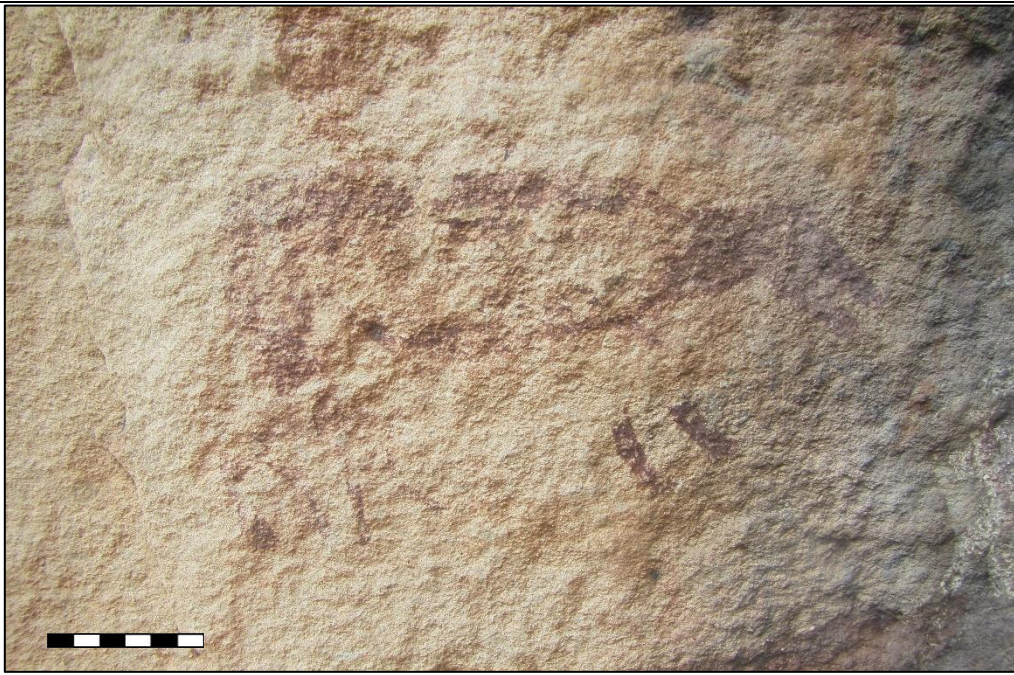

1905	S31 20 34.5 E26 20 46.7	This is a large rock shelter that contains some stone walling in its lower, right-hand side (facing in) under a large roof. There are rock paintings on two sides of the higher, more exposed part of the shelter. To the right, on a vertical wall, there is a large frieze of eland in yellow, white and red. More paintings occur on the very steeply overhanging rear wall of the shelter. The imagery	High / IIIA
------	----------------------------	--	-------------

here includes a possible rain animal, an eland that appears to be passing from one realm to another (only the head appears to have been painted on a dark streak while there is no evidence of a body on the clean rock) and, very close to this eland head, a running human figure placed on a splinter of rock that has broken away in the corner but not yet fallen out. Scales in cm.

1906	S31 20 33.5 E26 20 50.6	A light scattering of MSA flaked stone artefacts made on quartzite occurs on a slope among gravel clasts.	Very low / GPC
------	----------------------------	---	----------------

No photograph.			
1907	S31 20 27.9 E26 21 22.5	This is an agricultural field that is entirely walled with a stone wall.	Low / GPB
 			
1908	S31 20 24.2 E26 21 24.4	This house ruin is built with fired clay bricks and mud mortar on a plinth of dressed sandstone. The one remaining wall is plastered with mud mortar on the inside. Some newer bricks and modern grey cement indicate alteration of the building while it was still in use.	Medium / GPA

1909	S31 20 23.6 E26 21 24.5	This is a small dam surrounded by a stone wall.	Low / GPB
------	----------------------------	---	-----------

1910	S31 20 21.9 E26 21 23.2	This the remnant planted landscape that lies close to the house at waypoint 1908. The trees are mostly Cypress trees but some pines also occur.	Low
------	----------------------------	---	-----

1911	S31 20 22.2 E26 21 26.5	This is a dam whose wall is lined with stones. Although intact and filled with water, it must be heavily silted up as its entire surface has reeds present.	Low
------	----------------------------	---	-----

1912	S31 20 22.5 E26 21 28.2	This is a stone feature measuring 3 m by 7 m and was probably a farm outbuilding.	Low / GPB
------	----------------------------	---	-----------

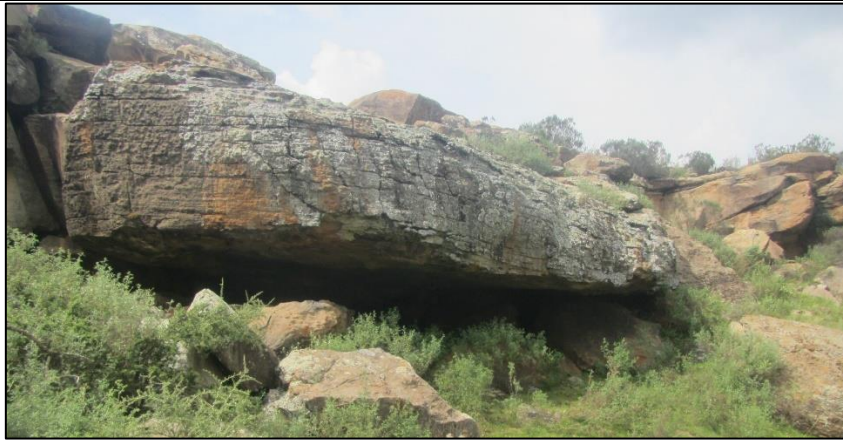

1913	S31 20 17.8 E26 21 27.8	This is a cluster of five stone features of varying shape and size but with a maximum dimension of 5 m. The possibility of their being graves was considered on site but dismissed on the grounds of size and general appearance of the site.	Very low / GPC
------	----------------------------	---	----------------

1914	S31 20 15.5 E26 21 31.6	This is a small rock shelter with a stone wall inside enclosing a space measuring 1 m by 5 m.	Low / GPB
1915	S31 19 53.9 E26 21 45.3	A rock shelter with LSA stone artefacts made on hornfels present on the talus slope.	Very low / GPC
No photograph.			
1916	S31 20 14.7 E26 22 37.2	This is a farm complex containing a number of historical features. Most notable is a 40 m long historical stone shed with a corrugated iron roof. It is evident that some of the internal roof structure is collapsing. There are stone-walled kraals adjoining the structure. There are also some tree lines, other stone walls and a small structure alongside the farmhouse that appears from its rustication as though it might be late 19 th century (both the barn and farmhouse are present on the 1943 aerial photography but all other structures to the south and southeast appear to be newer).	High

1917	S31 19 41.3 E26 22 13.4	This is a low and quite dark rock shelter with a 60 cm wide frieze of antelope painted in red and white on the back wall.	High / IIIA
------	----------------------------	---	-------------

1918	S31 18 55.3 E26 14 43.5	This is a small stone cairn located on top of a hill.	Very low / GPC
------	----------------------------	---	----------------

1919	S31 20 00.7 E26 15 41.7	This 24 m long stone shed has a corrugated iron roof and adjoining stone-walled kraals. It was not examined in detail.	Medium
------	----------------------------	--	--------

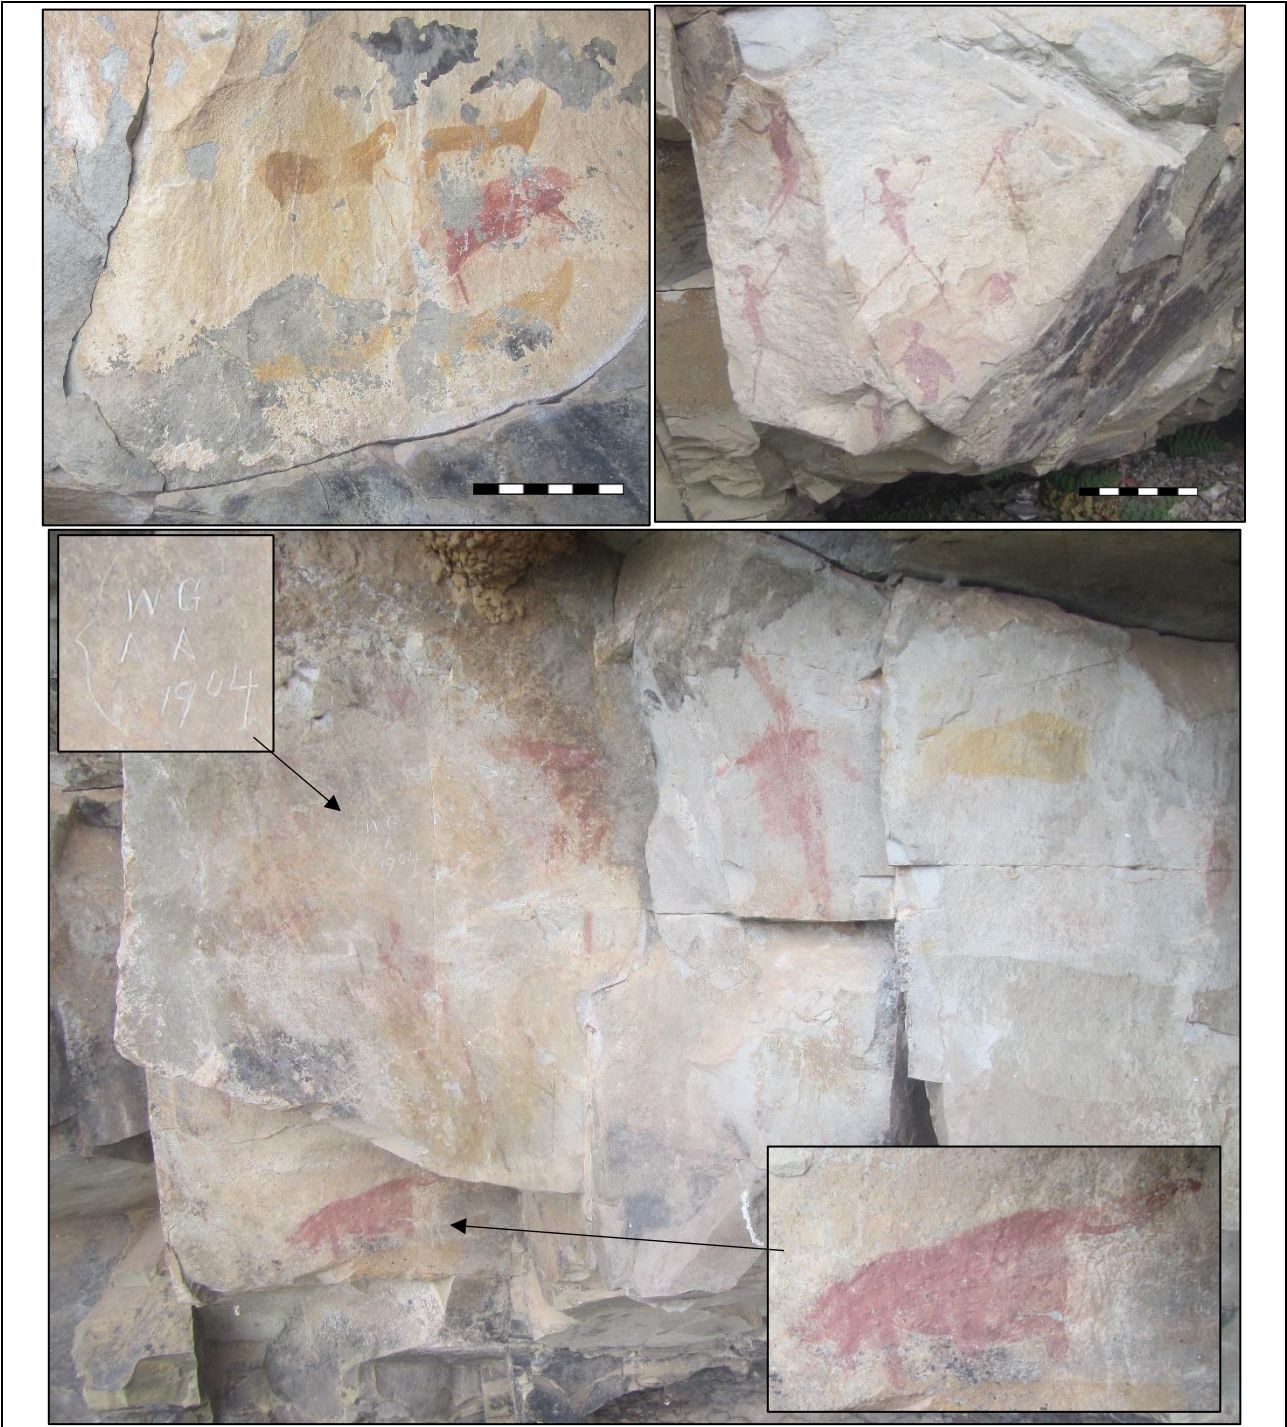

1920	S31 20 18.9 E26 20 04.7	This is a historical shed within a farm complex. It was not examined in detail.	Medium
			
1921	S31 17 54.9 E26 20 56.1	A complex of archaeological materials occurred among some sandstone boulders on a slope above a river. An area between the boulders had an arc-shaped stone wall enclosing the space, a rock shelter had a wall inside it and an extensive scatter of freshwater mussel shell (<i>Unio caffer</i>) occurred through the area. The site was not examined in detail as it lies just outside the study area.	Medium / GPA

1922	S31 17 43.8 E26 20 54.1	This site is the south-easternmost rock art panel of paintings along a cliff that overlooks a river and faces towards the southwest. Preservation is poor but some red human figures and other painted imagery in yellow can be seen.	High / IIIB
------	----------------------------	---	-------------

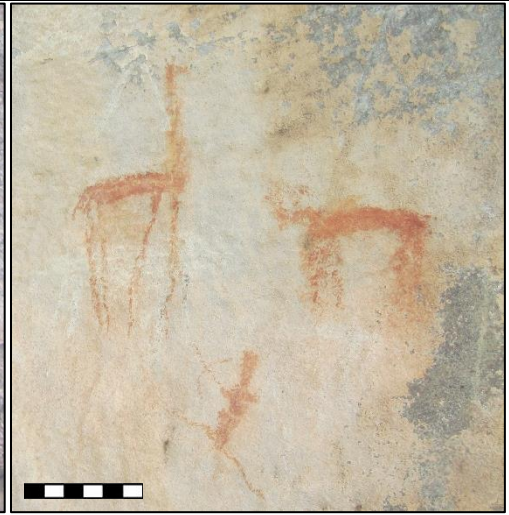

1923	S31 17 42.8 E26 20 52.9	<p>Many paintings occur between waypoints 1923 and 1924. A selection of them are illustrated here with scales in cm. They include a panel of four yellow and one red animal, a panel of human figures in various positions and with very thin legs, a panel with various images and patches of colour in red, yellow and black, one of which might be a rain animal and a panel of four small yellow and white antelope. An inscription of "W G A A 1904" occurs on one of the panels. Elsewhere in this site are further human figures, eland, and some (presumably) stylised humans that appear as crosses. There is also a small panel with graffiti that includes PJC 200_ (last digit is smudged), Bobby 1977 and W. Steyn 11-3-1906.</p>	High / IIIA
1924	S31 17 42.2 E26 20 52.3		

1925	S31 17 41.8 E26 20 51.7	<p>This approximately 10 m long section of the cliff has the most paintings on it and stretches between waypoints 1925 and 1926. At the north-western end there is a small rock shelter which is where the greatest density of paintings occurs. This section of the cliff contains many human and animal images with the former all in red and the latter in red, white and yellow. There is also one small panel with less formal painting that has two animals and a human figure holding a bow and arrow. These may be 'crayon drawings', literally drawn onto the rock using a piece of ochre.</p>	High / IIIA
1926	S31 17 41.5 E26 20 51.5		

1927	S31 18 08.4 E26 20 04.5	This is an informal farm graveyard containing sixteen graves. The nearest one is located within 1 m of the edge of the adjacent farm road. All graves have stone mounds but one of them included a small metal plaque.	High / IIIA
------	----------------------------	--	-------------

1928	S31 17 39.2 E26 18 50.8	An 8 m by 4 m stone-walled ruin lies adjacent to a farm fence. A small portion stands about 1 m high, but the rest is only visible in the grass.	Low / GPB
------	----------------------------	--	-----------

1929	S31 17 36.6 E26 18 45.2	This is a 3 m by 3 m stone-walled structure that must have been a house. It has a door opening towards the northeast. Most walls are standing more than a meter high and the two skins with rubble fill construction technique is evident.	Low / GPB
1930	S31 17 23.1 E26 17 34.3	This is a 30 m long piled stone wall located on the summit of Rooikop. It faces towards the southeast. Related to ABW.	Medium / GPA

1931	S31 17 24.1 E26 17 31.8	This is a 30 m long piled stone wall located on the summit of Rooikop and built along the upper edge of a low cliff. It faces towards the south. Related to ABW.	Medium / GPA
------	----------------------------	--	--------------

1932	S31 17 23.7 E26 17 31.3	This is a 15 m long piled stone wall located on the south-western part of the summit of Rooikop. It faces towards the northwest. Related to ABW.	Medium / GPA
			
1933	S31 17 23.9 E26 17 31.1	A light scatter of LSA flaked stone artefacts on hornfels occurs on the summit of Rooikop.	Very low / GPC
No photograph.			
1934	S31 17 35.6 E26 17 23.0	This site lies towards the southwest on a small subsidiary summit of Rooikop. The entire summit is walled with a piled stone wall that encloses an area of 12 m by 25 m. Related to ABW.	Medium / GPA
			

1935	S31 17 38.2 E26 17 20.4	This site is located on the furthest southwest high point along the summit ridge of Rooikop. It is a circular fort of 3 m diameter made from dolerite cobbles. It is placed in such a way as to have a 300 degree view extending from the north-northwest right round to the northeast. Related to ABW.	High / IIIB
			

1936	S31 17 22.9 E26 17 32.8	<p>Just northeast of the summit beacon of Rooikop is a now demolished 8 m diameter Boer blockhouse. It may have been deliberately demolished and manifests as a large circular pile of rocks but with the lowermost remnants of the walls visible. On the western side there is a section of walling standing to about 1 m height and towards the northwest a small straight wall extends out from the blockhouse. Related to ABW.</p>	High / IIIB
			

1937	S31 17 22.9 E26 17 33.4	This is a 3 m by 4 m structure built in a flat area with minimal view of the surrounding landscape. It may have served a residential function for soldiers stationed on Rooikop. Related to ABW.	Medium / GPA
			
1938	S31 17 22.1 E26 17 33.9	This is a 15 m long piled stone wall located on the northern part of the summit of Rooikop. It faces towards the north. Related to ABW.	Medium / GPA
			

1939	S31 17 22.3 E26 17 34.6	This is a 6 m long piled stone wall located on the north-eastern part of the summit of Rooikop. It faces towards the east and has been built between natural outcropping rocks. Related to ABW.	Medium / GPA
			
1940	S31 17 05.0 E26 17 50.7	This is a badly collapsed structure that looks like it was a circular fort of about 3 m diameter. In one area it is evident that the structure had a thick wall with two skins of cobbles and a thick rubble fill. It is located right on the edge of the flat area on the ridge looking directly over the Stormberg Junction. Related to ABW.	High / IIIB

1941	S31 17 04.7 E26 17 54.8	A stone-walled structure with a view out towards the northwest. It is located right on the edge of the flat area on the ridge looking directly over the Stormberg Junction. Related to ABW.	Medium / GPA
------	----------------------------	---	--------------

1942	S31 17 08.4 E26 18 01.6	This is a tiny remnant of walling placed on a flat bedrock exposure. It is less than 1 m long and completely undiagnostic. It is in a flat area with no view over the surrounding countryside. Given its location amongst many ABW features, it too is assumed to be related to the war.	Very low / GPC
------	----------------------------	--	----------------

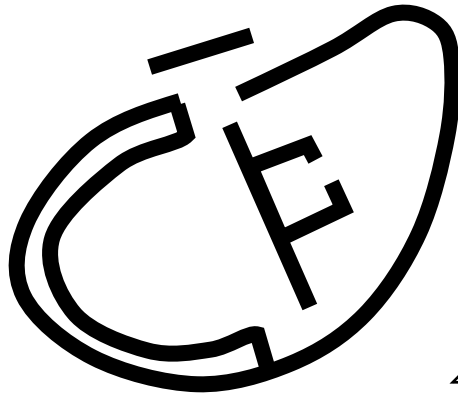

1943	S31 17 08.5 E26 18 01.2	This is a stone-walled structure of 2 m by 4 m that is in a flat area with no view over the surrounding countryside (and hence was protected) and presumably had a residential function for the ABW.	Medium / GPA
------	----------------------------	--	--------------

1944	S31 17 06.1 E26 18 04.4	This is another ABW Boer blockhouse. It is a peculiar shape and is divided into two rooms by a central wall. The eastern one has a small enclosure inside it, while the western one has a 'bench' all around the inside of the main wall on which to stand while making use of the loopholes. The wall is a gravity wall that gets fatter towards the base. The maximum length of the structure is 21 m with the breadth at 90 degrees to the length being 14 m to the wall outside the entrance. Unfortunately, much of the upper walls has been demolished or collapsed over time. The blockhouse is on the north-western edge of the ridge and looks directly out over the Stormberg Junction to the northwest.	High / IIIA
------	----------------------------	--	-------------

1945

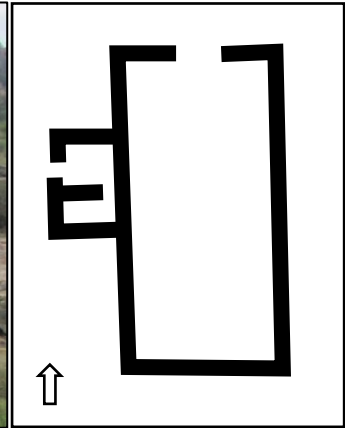

S31 17 04.2
E26 18 06.4

This is a small structure measuring 2 m by 2 m located on a flat area with no view (and hence was protected). It presumably had a residential function.

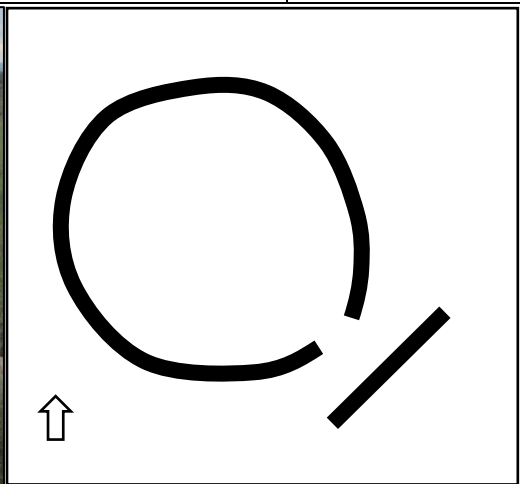

Medium / GPA

1946	S31 17 03.9 E26 18 08.0	This is a large stone-walled structure measuring 23 m by 15 m. It may have been a barracks or store of some sort. It has a large enclosure as well as two smaller ones. The structure is on a flat area up against a low scarp on the summit ridge of the Rooikop mountain. Assumed to relate to the ABW.	High - IIIB
------	----------------------------	---	-------------

1947	S31 17 02.1 E26 18 07.7	This is the remains of a circular ABW fort of about 8 m diameter. It has an entrance facing towards the southeast with a protective straight wall in front of the opening.	High / IIIB
------	----------------------------	--	-------------

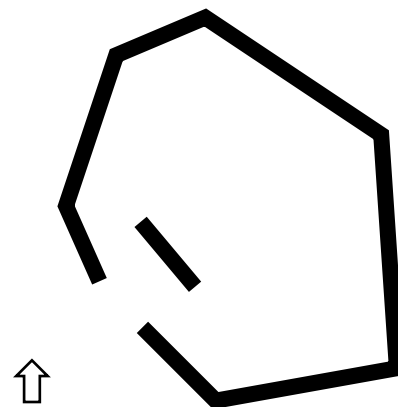

1948	S31 16 57.0 E26 18 11.5	This stone-walled structure is badly collapsed but appears to have been an ABW fort of about 4 m diameter. Some fragments of a tin can were found alongside it. It lies on the northern edge of the Rooikop mountain and looks out towards the north.	Medium / GPA
			
1949	S31 17 04.4 E26 18 10.5	Located just to the east of waypoint 1946, this is a structure of 3 m by 4 m with a door facing towards the west. By its location it is assumed to relate to the ABW.	Medium / GPA
			
1949a	S31 17 05.4 E26 18 11.0	This is a scatter of black glass located above the low scarp behind the waypoint 1949 structure and presumably related to it.	Very low / GPC
No photograph.			

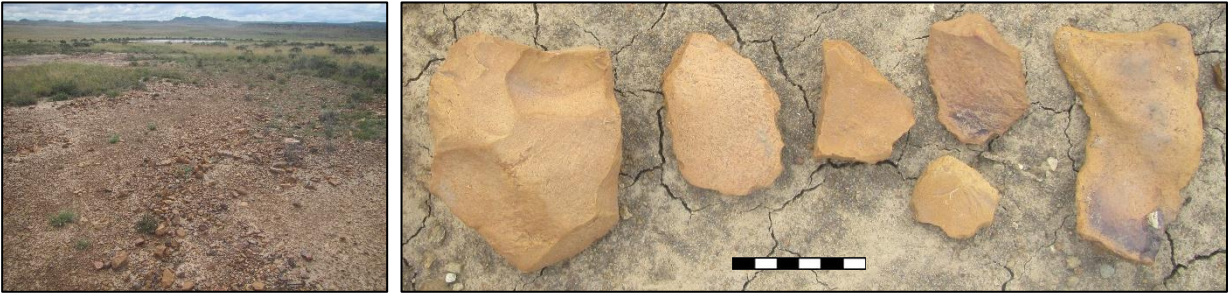

1950

S31 17 01.4
E26 18 17.3

This is an ABW Boer blockhouse that was built as a seven-sided structure with an entrance facing towards the southwest. A short straight wall lies just inside the entrance. It is located on the northern part of the Rooikop ridge but is on a flat area a little back from the edge such that it does not have a good view of the surrounding landscape.

High / IIIB

1951	S31 17 11.7 E26 18 16.3	This is a six-sided stone-walled structure located much further back on the Rooikop mountain but exactly on the highest part of the ridge. No door is evident, but this may be due to preservation. Some coal, ceramic and bone fragments were seen outside the structure. Related to ABW.	High / IIIB
			
1952	S31 19 47.8 E26 20 44.7	An ephemeral scattering of MSA artefacts on an orange-patinated rock were found in a denuded area at the foot of a hill.	Very low / GPC
			
1953	S31 19 44.0 E26 21 07.8	This rock shelter has a very small piece of stone walling in it and on the talus slope a piece of iron potjie and some LSA artefacts in hornfels were seen.	Very low / GPC
			

1954	S31 19 55.0 E26 20 51.2	This is a small rock shelter with some walling in it. The total area contained by the walling is about 5 m long and 1 m wide.	Very low / GPC
			
1955	S31 19 57.4 E26 20 50.1	This is a very shallow rock shelter which had some LSA stone artefacts in hornfels scattered over its talus slope.	Very low / GPC
			
1956	S31 23 12.5 E26 16 04.2	This is a rock shelter which had some LSA stone artefacts in hornfels scattered over its talus slope	Very low / GPC
No photograph.			

1957	S31 22 09.2 E26 15 17.3	This is a historical stone-walled shed with a corrugated iron roof. A section recently collapsed due to the heavy rain and it is being rebuilt using mud mortar.	Medium
			
1958	S31 22 15.6 E26 15 29.8	This isolated sandstone slab faces approximately east and might well be a grave and is graded accordingly. It is very close to the edge of a deep erosion gully. No sign of an old fence line was visible here.	High / IIIA
			
1959	S31 22 09.7 E26 15 36.0	This is a small stone-lined dam wall that has been breached.	Low / GPB
No photograph.			
1960	S31 21 38.9 E26 16 19.6	A scattering of LSA hornfels flaked stone artefacts in an area among large sandstone blocks.	Very low / GPC
No photograph.			

<p>1961</p>	<p>S31 21 37.2 E26 16 21.5</p>	<p>This is a small rock shelter with rock paintings in it. There is a boulder on the floor of the shelter. Although its upper surface is sloping, it is heavily ground and has ochre staining that suggests ochre was ground on this boulder, perhaps to use for the paintings. The paintings occur in two sections. (1) To the right of the ground boulder there is a panel with two long rows of finger dots. Near their right-hand end are several human figures. (2) To the left of the ground boulder there is a higher alcove with painting on an elongated slab that has detached from the back wall, a single human figure on the back wall, and a series of images on the right-hand wall of the alcove. The slab has a series of human figures on it, as well as two black animals, one of which has horns suggestive of cattle rather than a wild animal. The right-hand panel has a long series of human figures. To its right, on a separate piece of rock there is a yellow animal that looks like an elephant with its trunk held out horizontally. The torso and rear legs look more like an land and this creature could therefore be a rain animal.</p>	<p>High / IIIA</p>
-------------	------------------------------------	---	--------------------

1962	S31 21 36.9 E26 16 22.1	This is a small rock shelter with very faded paintings on its back wall. The imagery is difficult to decipher due to the poor preservation.	Low / GPB
No photograph.			
1963	S31 21 33.3 E26 16 24.9	This stone-walled structure is heavily overgrown and its overall form and size could thus not be determined. Its estimated size is about 12 m by 15 m. It is an agricultural structure, perhaps a kraal, and has an opening facing towards the northeast.	Low / GPB
			
1964	S31 21 30.9 E26 16 32.7	This site lies on a ledge that occurs midway up a cliff. There are many small shelters along the ledge but this one has a wall on one side of it. Above the wall is a single painted animal figure that looks like a feline with a very long tail. The animal is in yellow but has a red-painted eye and mouth (scale in cm).	High / IIIA
			

1965	S31 21 31.0 E26 16 33.4	This is another spot along the ledge mentioned under waypoint 1964. A small section of walling has been built against the cliff, almost like a windbreak, using flat slabs.	Low / GPB
------	----------------------------	---	-----------

1966	S31 21 31.5 E26 16 34.3	This is another spot along the ledge mentioned under waypoint 1964. A small section of walling has been built against the cliff.	Low / GPB
------	----------------------------	--	-----------

1967	S31 21 39.2 E26 16 34.9	In this area a low stone wall had been built along the upper edge of a low cliff, presumably either to	Low / GPB

		make the cliff less easy for animals to climb or to stop them descending it from the land above.	
			
1968	S31 22 16.5 E26 15 29.2	This is an ephemeral scatter of MSA artefacts on quartzite and a pale rock. It has been revealed by erosion (scale in cm).	Very low / GPC
			
1969	S31 22 16.6 E26 15 23.9	This is a large dam built with a large earth wall and a concrete and stone spillway. There are also other stone walls below the spillway which are probably earlier water-related infrastructure. An old cement mixer stands alongside the dam wall.	Low
			
1970	S31 20 36.5 E26 15 26.0	This is an old stone-built farm outbuilding that seems to be part shed and part residential. Its roof is of corrugated iron. The building was not	High

		<p>examined in detail and the rest of this complex was not visited.</p>	
			
<p>1971</p>	<p>S31 19 34.0 E26 16 44.6</p>	<p>This rock shelter has two enclosures built into it. One of them has a wall extending to the roof and it has been built with stones and mud mortar and is plastered internally. The second enclosure is a lower wall and sits to the right of the first (looking in). On the rear wall of the shelter there is a panel of rock art with three eland in yellow (one of which has white details preserved) and one in red. The paintings are quite poorly preserved. Scale in cm.</p>	<p>High / IIIB</p>
			

1972	S31 19 33.4 E26 16 43.1	This is a stone-walled kraal of about 10 m by 15 m. It has a rounded shape and one end is narrower than the other.	Low / GPB
			
1973	S31 19 32.9 E26 16 41.5	This stone-walled structure is close to waypoint 1972 and is also an irregular shape. It measures about 7 m by 8 m.	Low / GPB

1974	S31 19 34.1 E26 16 39.0	This is an old fence line that has both standing stones for fence poles and also stones packed along what would have been the base of the fence.	Very low / GPC
------	----------------------------	--	----------------

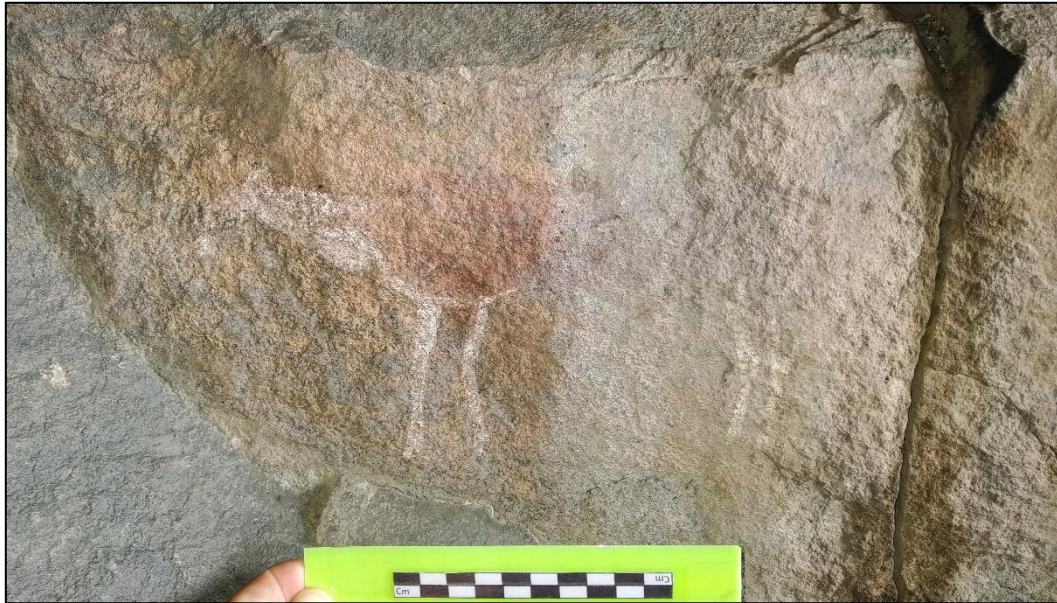

913	S31 18 14.5 E26 19 37.9	A shallow rock shelter with stone walling in front of it and a single small, poorly preserved red animal painting.	Low / GPB
-----	----------------------------	--	-----------

914	S31 18 15.7 E26 19 37.8	A rock shelter with a small section of stone walling and some rock paintings. Some indeterminate,	High / IIIB
-----	----------------------------	---	-------------

poorly preserved images occur on the left wall and a better preserved left-facing red and white eland lies immediately left of the walling. Scales in cm.

915	S31 18 15.8 E26 19 36.9	A rock shelter with an indeterminate stone feature in front of it and a very poorly preserved painting on the left wall inside the shelter.	Low / GPB
-----	----------------------------	---	-----------

916	S31 18 16.3 E26 19 36.8	A small semi-circular stone wall in front of a rock outcrop.	Very low / GPC
-----	----------------------------	--	----------------

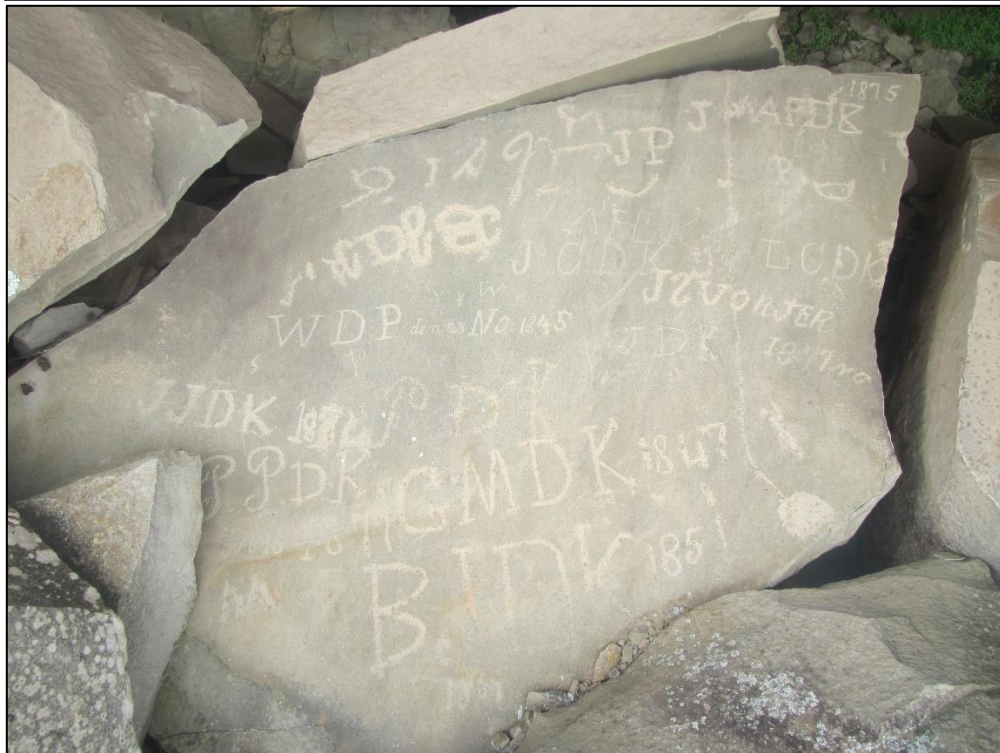

917	S31 18 10.1 E26 19 56.3	A rock terrace with a light scatter of hornfels artefacts. Scale in cm.	Very low / GPC
-----	----------------------------	---	----------------

918	S31 17 51.9 E26 20 03.4	A rock shelter high on a hill with four red painted animals, probably eland, with two of them being incomplete due to exfoliating rock. Scale in cm.	High / IIIB
-----	----------------------------	--	-------------

919	S31 20 00.3 E26 20 51.2	A rock shelter with a fallen slab inside it which has had many initials and dates engraved on it. All the dates are 19 th century as follows: 1845, 1847, 1851, 1869, 1874, 1875 and 1877. There is also a small, poorly preserved red animal (probably an antelope) on the wall behind the slab.	High / IIIA
