**REPORT**  
**PROPOSED ALTERATIONS AND ADDITIONS TO CHURCH AT 80**  
**CARLISLE STREET, DURBAN**

This report is to be read in conjunction with the submitted plans.

At the outset, sincere thanks to Carol Bailey, her drawings and who I met of the church for this opportunity, as well as AMAFA. I have received full co-operation from all parties. Carol has a remarkable collection of old photographs of the project.

**1. OLD TOWER**

This raised concern originally, since it is juxtaposed against the superb building by Philip Dudgeon.

Based on my suggestions, Carol added a small arch to attune it, top the above. We are both happy with the results and trust that this is shared by all concerned.

Proposed new bell tower location

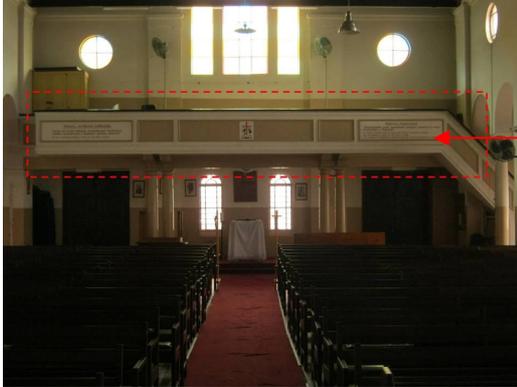

**2. THE INTERIOR BALCONY**

This is a much trickier operation and Carol has responded well, in my opinion.

The tower is an extension of the original, built in identical columns to 'match' the original. It was clouded by the Engineer's report.

We believe that it is now an excellent match!

proposed area to be altered.

### 3. AWNINGS

An unfortunate existing approval with no input from Carol. It is merely a 'measured drawing.'

Existing awning.

### 4. CARPORT

The same applies as above.

Existing carport

In light of the above points we trust that the heritage authorities will approve of this project and quickly provide their documentation, which is being called for by the Local Authority.
