Hi Jeffrey

I still feel bad forgetting your name!

That specific area would not require an HIA as it is under the size.

I have attached a list (pages 1-2) for what triggers and HIA. The rest is my method.

Regards

Gavin

Hi Gavin

hope you doing well, we spoke last week at kids school re: project i am currently conducting an EIA for. there is a possibility that an HIA might be required. the project is proposed around lake Qhubu around Eskhawini. its a fish farm project.

i attached a KMZ file if you can check for me any possible heritage things that could be impacted upon by development.

Kind regards
