PER E-MAIL/MAIL

Dear Ms Grimbeek

ENVIRONMENTAL AUTHORISATION IN TERMS OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, ACT NO. 107 OF 1998, AS AMENDED FOR THE PROPOSED CAMDEN I WIND ENERGY FACILITY AND ASSOCIATED INFRASTRUCTURE ON PORTION 0, 1 AND 3 OF KLIPFONTEIN FARM 442, PORTION 1 AND 2 OF WELGELEGEN FARM NO. 322, PORTION 2 AND 10 OF UITKOMST 292, PORTION 3 OF LANGVERWATCH FARM NO. 293, PORTION 14 OF MOOIPLAATS 290 AND PORTION 3 OF KLIPBANK FARM 295 NEAR ERMELO WITHIN MSUKALIGWA LOCAL MUNICIPALITY IN GERT SIBANDE DISTRICT MUNICIPALITY IN MPUMALANGA PROVINCE

With reference to the above application, please be advised that the Competent Authority has decided to grant authorisation. The Environmental Authorisation (EA) and reasons for the decision are attached herewith.

In terms of Regulation 4(2) of the Environmental Impact Assessment Regulations, 2014, as amended (the EIA Regulations), you are instructed to notify all registered interested and affected parties, in writing and within fourteen (14) days of the date of the decision, as well as the provisions regarding the submission of appeals that are contained in the EIA Regulations.

In terms of the Promotion of Administrative Justice Act, 2000 (Act No 3 of 2000), you are entitled to the right to fair, lawful, and reasonable administrative action; and to written reasons for administrative action that affects you negatively. Further your attention is drawn to the provisions of the Protection of Personal Information Act, 2013 (Act no. 4 of 2013) which stipulates that the Competent Authority should conduct itself in a responsible manner when collecting, processing, storing, and sharing an individual or another entity's personal information by holding the Competent Authority accountable should the Competent Authority abuses or compromises your personal information in any way.

Your attention is drawn to Chapter 2 of the National Environmental Management Act, 1998 (Act No. 107 of 1998) National Appeal Regulations published under Government Notice R993 in Government Gazette No. 38303 dated 08 December 2014 (National Appeal Regulations, 2014), which prescribe the appeal procedure to be followed.

Kindly include a copy of this document (National Appeal Regulations, 2014) with the letter of notification to interested and affected parties in this matter.

Should any person wish to lodge an appeal against this decision, he/she must submit the appeal to the appeal administrator, and a copy of the appeal to the applicant, any registered interested and affected party, and any organ of state with interest in the matter within 20 days from the date that the notification of the decision was sent to the registered interested and affected parties by the applicant; or the date that the notification of the decision of the decision was sent to the applicant by the Competent Authority, whichever is applicable.

Appeals must be submitted in writing in the prescribed form to:

The Director: Appeals and Legal Review of this Department at the below mentioned addresses.

By email: <u>appealsdirectorate@dffe.gov.za</u>

By hand: Environment House 473 Steve Biko Arcadia Pretoria 0083; or

By post: Private Bag X447 Pretoria 0001

Please note that in terms of Section 43(7) of the National Environmental Management Act, Act No. 107 of 1998, as amended, the lodging of an appeal will suspend the environmental authorisation or any provision or condition attached thereto. In the instance where an appeal is lodged, you may not commence with the activity until such time that the appeal is finalised.

To obtain the prescribed appeal form and for guidance on the submission of appeals, please visit the Department's website at https://www.environment.gov.za/documents/forms#legal_authorisations or request a copy of the documents at appealsdirectorate@dffe.gov.za.

Yours faithfully

Medanas

Ms Milicent Solomons Acting Chief Director: Integrated Environmental Authorisations Department of Forestry, Fisheries, and the Environment Date: 10/03/2003.

Environmental Authorisation

In terms of Regulation 25 of the Environmental Impact Assessment Regulations, 2014, as amended

Proposed <u>Camden I</u> Wind Energy <u>Facility</u> and associated <u>infrastructure</u> on <u>Portion</u> 0. 1 and 3 of Klipfontejn Farm <u>442</u>, <u>Portion 1 and 2 of Wei</u> qeleven Farm <u>No. 322</u> Portion 2 and 10 of llitkpmst 292. <u>Portion 3 of Langverwatch Farm</u> No. <u>293</u>, <u>Portion 14 of Mooiplaats</u> 290, <u>and Portion 3 of Klipbank Farm</u> <u>295 nea</u>r Ermelo <u>within Msukaliqwa Local Municipality in in Mpumalanga Province</u>

Gert Sibande District Municipality

Application Register Number:	74/72/76/3/3/2/2737
Applicant:	Camden 1 Wind (RF) Pty Ltd
Location of activity:	Portion 0, 1 and 3 of Klipfontein Farm 442,
	Portion 1 and 2 ofWelgelegen Farm No. 322,
	Portion 2 and 10 of Uitkomst 292, Portion 3
	of Langverwatch Farm No. 293, Portion 14 of
	Mooiplaats 290, and Portion 3 of Klipbank
	Farm 295 near Ermelo within Msukaligwa
24	Local Municipality in Gert Sibande District
	Municipality in Mpumalanga Province

This authorisation does not negate the holder of the authorisation's responsibility to comply with any other statutory requirements that may be applicable to the undertaking of the activity.

Decision

The Department is satisfied, on the basis of information available to it and subject to compliance with the conditions of this Environmental Authorisation, that the applicant should be authorised to undertake the activities specified below.

Non-compliance with a condition of this Environmental Authorisation may result in criminal prosecution or other actions provided for in the National Environmental Management Act, Act No. 107 of 1998, as amended and the EIA Regulations, 2014, as amended.

Details regarding the basis on which the Department reached this decision are set out in Annexure 1.

Activities Authorised

By virtue of the powers conferred on it by the National Environmental Management Act, Act No. 107 of 1998, as amended and the Environmental Impact Assessment Regulations, 2014, as amended, the Department hereby authorises -

CAMDEN I WIND (RF) PTY LTD

with the following contact details -

Ms Mercia Grimbeek Suite 104, The Albion Springs Office Park 183 Main Road, Rondebosch

CAPE TOWN

7701

to undertake the following activities (hereafter referred to as 'the activity") indicated in Listing Notice 1, Listing Notice 2 and Listing Notice 3 of the EIA Regulations, 2014 as amended:

Activity number	Activity description
Listing Notice 1, Activity 11(i):	
"The development of facilities or infrastructure for	The facility is located outside urban areas. Furthermore,
the transmission and distribution of electricity—	internal distribution electrical infrastructure required to
(i) outside urban areas or industrial complexes	connect the respective electrical components related to
with a capacity of more than 33 but less than 275	the facility, and the onsite substation, including cabling
kilovolts; or	(buried or overhead) will be between 33kV and 132kV.
	The onsite substation will consist of a high voltage
	substation yard to allow for up to 132kV feeder bays and
	transformers.
Listing Notice 1, Activity 12(ii)(a)(c):	
"The development of—	The facility will require the development of internal roads
(ii) infrastructure or structures with a physical	and/or access roads around the site (total physical
footprint of 100 square metres or more,	footprint of approximately 720 000m ²). The physical
where such development occurs—	footprint of internal access roads and electrical cabling
(a) within a watercourse; or	required to connect the various components of the
(c) if no development setback exists, within 32	facility will either traverse the delineated watercourses
metres of a watercourse, measured from the edge	on site or be located within 32m of the outer extent of the
of a watercourse	delineated watercourses on site and is estimated at *
	1300m ² , subject to detail design, thereby exceeding the
	threshold value and triggering this activity.
Listing Notice 1. Activity 14:	
The development and related operation of	The facility will require storage and handling of
facilities or infrastructure, for the storage, or for the	dangerous goods, including fuel, cement, and chemical
storage and handling, of a dangerous good, where	storage onsite, that will be greater than 80m 3 but not
such storage occurs in containers with a combined	exceeding 500m ³ . The following estimated maximum
capacity of 80 cubic metres or more but not	capacities of dangerous good will be stored on site:
exceeding 500 cubic metres.	- Concrete batching: *145 m ³
	- Fuel stores (petrol and/or diesel): *250m ³
	- Paint, grease, transformer oils, construction chemicals,
	lubricants: ~100m ³

Listing Notice 1, Activity 19:	
The infilling or depositing of any material of more	Internal access roads, and stormwater control
than 10 cubic metres into, or the dredging,	infrastructure, as well as electrical cabling required to
excavation, removal or moving of soil, sand,	connect the various components of the facility will
shells, shell grit, pebbles, or rock of more than 10	collectively require the excavation, infilling or removal of
cubic metres from a watercourse.	soil exceeding 10m ³ from delineated watercourses on
	site however, these will be within the thresholds relevant
	to this Listed Activity and therefore within the threshold
	values and triggering this activity.
Listing Notice 1, Activity 24(ii):	Internal access roads required by the facility will be
The development of a road—	without reserve and vary between 8 - 20m wide, to allow
(ii) with a reserve wider than 13,5 meters, or where	for larger component transport. The exact values will be
no reserve exists where the road is wider than 8	confirmed once final designs have been provided
metres.	however, these will be within the thresholds relevant to
	this Listed Activity and therefore within the threshold
	values and triggering this activity.
Listing Notice 1, Activity 28(ii):	
Residential, mixed, retail, commercial, industrial,	The facility is considered a commercial and/or industrial
or institutional developments where such land was	development and is located on several farm portions
used for agriculture, game farming, equestrian	outside an urban area, used for agricultural purposes.
purposes or afforestation on or after 01 April 1998	The total area to be developed for the facility (buildable
and where such development:	area) is approximately 200ha (i.e., greater than 1ha
(ii) will occur outside an urban area, where the	within agricultural use land).
total land to be developed is bigger than 1 hectare.	
Listing Notice 1, Activity 30:	
Any process or activity identified in terms of	The facility infrastructure is located within, and will
section 53(1) of the National Environmental	require vegetation clearance or disturbance of, Eastern
Management: Biodiversity Act, 2004 (Act No. 10	Highveld Grassland, Eastern Temperate Freshwater
of 2004).	Wetlands and Chrissiesmeer Panveld. All three
	ecosystems are confirmed to be listed in the National List
	of Ecosystems that are Threatened and in need of
	Protection (as indicated in GNR 1002 of 9 December
	2011). Since these ecosystems are listed as threatened
	it is assumed that various threatened or protected

.

	species will be found within the development area. The
	restricted activity of "cutting, chopping off, uprooting,
	damaging or destroying, any specimen" has been
	identified in terms of NEM:BA and is therefore applicable
	to the vegetation clearance that will be required to
	construct the development. In light of this, Activity 30 is
	considered applicable.
Listing Notice 1, Activity 48(i)(a)(c):	
The expansion of—	Transport of large infrastructure components related to
(i) infrastructure or structures where the physical	the facility will require the expansion of existing access
footprint is expanded by 100 square metres or	and/or internal roads, culverts or similar drainage
more, or	crossing infrastructure collectively exceeding 100m ² or
where such expansion occurs—	more beyond existing road or road reserves located
(a) within a watercourse,	within delineated watercourses on site, or within 32m of
(c) if no development setback exists, within 32	the outer extent of the delineated watercourses on site.
metres of a watercourse, measured from the edge	Expansion of - 2 000m ² is required for the facility,
of a watercourse.	thereby exceeding the threshold value and triggering this
	activity.
Listing Notice 1, Activity 56(H):	
The widening of a road by more than 6 metres, or	Transport of large infrastructure components related to
the lengthening of a road by more than 1	the facility will require the widening of existing access
kilometre—	and/or internal roads where no reserve exists and where
(ii) where no reserve exists, where the existing	such road is wider than 8 metres. The facility is located
road	within a rural area. Subject to detail design widening of
is wider than 8 metres.	- 14m in width collectively exceeding 1km in length will
	be required for the facilit, thereby exceeding the
	threshold value and triggering this activity.
Listing Notice 2, Activity1:

■ for the proposed Camden I Wind Energy Facility and associated infrastructure on Portion 0, 1 and 3 of Klipfontein Farm 442, Portion 1 and 2 of Welgelegen Farm No. 322, Portion 2 and 10 of Uitkomst 292, Portion 3 of Langverwatch Farm No. 293, Portion 14 of Mooiplaats 290, and Portion 3 of Klipbank Farm 295 near Ermelo within Msukaligwa Local Municipality in Gert Sibande District Municipality in Mpumalanga Province, hereafter referred to as "the property"

4.0

The proposed development footprint (buildable area) is approximately 200ha, and the full extent of the project area is approximately 6700 ha and was assessed. The development footprint includes the turbine positions and all associated infrastructures as outlined below.

Technical details of the proposed Camden | WEF Facility:

Infrastructure	Description/ Dimensions	
Capacity	- 200MW	
Number of turbines	■ 37	
Development footprint	 Approximately 200ha 	
Project area (assessed area)	 Approximately 6700 ha 	
Turbine hub height	■ Up to 200m	
Rotor diameter	■ Up to 200m	
Turbine foundation	 25m diameter x 4.5m deep 	
Permanent hard standing area	 Approximately 4ha. 	
for each wind turbine		
Onsite substation	 Footprint of approximately 1.5ha. 	
	 Upto 132kV capacity 	
Battery Energy Storage System	■ Footprint: up to 5ha	
	Storage capacity will be up to 200MW/800 megawatt-hour (MWh) with	
	up to four hours of storage.	
	 Lithium Battery or Vanadium Redox Flow Technologies 	
	 Main components include the batteries, power conversion system and 	
	transformer which will all be stored in various rows of containers	
	 BESS components will arrive on site pre-assembled 	
Operation and Maintenance	Operations and maintenance (O&M) building infrastructure will be required	
Building	to support the functioning of the WEF and for services required by	
	operations and maintenance staff. The O&M building infrastructure will be	
	in close proximity to the site substation and will include:	
	 Operations building of approximately 200m² 	
	 Workshop and stores area of approximately 300m²; and 	
	■ Refuse area for temporary waste storage and conservancy tanks to	
	service ablution facilities.	

Construction Camp Laydown,	Construction camp laydown and concrete batching plant footprint of up	
batching plant, concrete wind	to 5ha.	
tower factory, laydown areas	Concrete wind tower plant of approximately 7ha (if necessary),	
	comprising amongst others, a concrete storage area, batching plant,	
	electrical infrastructure and substation, generators and fuel stores,	
	gantries and loading facilities, offices, material stores (rebar, concrete,	
	aggregate and associated materials), mess rooms, workshops,	
	laydown and storage areas, sewage and toilet facilities, offices and	
	boardrooms, labour mess and changerooms, mixers, moulds and	
	casting areas, water and settling tanks, pumps, silos and hoppers, a	
	laboratory, parking areas, internal and access roads;	
	 Temporary laydown area of up to 3ha for the storage of equipment, 	
	materials, fuels, cement, chemicals etc; and	
	 Sewage: conservancy tanks and portable toilets. 	
Access Road	 Via two existing farm gravel roads; the D260 or the D1107 roads. 	
Length of internal Roads:	■ Gravel roads of approximately 60km	
Width of roads	The roads will be between 5m and 6m wide. However, where require	
	for turning circle/bypass areas, access or internal roads may be up to	
	20m to allow for larger component transport.	
Height of fencing	■ Up to 4m high	
Specifications of onsite	The medium voltage collector system will comprise of cables up to and	
switching stations,	including 33kV that run underground, except where a technical	
transformers, invertors, onsite	assessment suggest that overhead lines are required, within the facility	
cables etc	connecting the turbines to the onsite substation	
Associated Infrastructure	■ Lighting, lightning protection,	
	 Telecommunication infrastructure, 	
	■ Storm water channels,	
	Water pipelines,	
	■ water pipelines,	
	 Offices, 	
	■ Offices,	
	Offices,Operational control centre,	
	 Offices, Operational control centre, Operation and Maintenance area/warehouse/workshop, 	

. -

\$.

		■ Offices,
	■ Warehouses,	
		■ Security building,
65	65	■ A visitor's centre; and
		 Substation building.

Conditions of this Environmental Authorisation

Scope of authorisation

- The proposed Camden I Wind Energy Facility and the preferred WEF on-site substation and BESS Alternative 2 as well as associated infrastructure on Portion 0, 1 and 3 of Klipfontein Farm 442, Portion 1 and 2 of Welgelegen Farm No. 322, Portion 2 and 10 of Uitkomst 292, Portion 3 of Langverwatch Farm No. 293, Portion 14 of Mooiplaats 290, and Portion 3 of Klipbank Farm 295 near Ermelo within Msukaligwa Local Municipality in Gert Sibande District Municipality in Mpumalanga Province is approved as per the geographic coordinates cited in the table above.
- 2. Authorisation of the activity is subject to the conditions contained in this Environmental Authorisation, which form part of the Environmental Authorisation and are binding on the holder of the authorisation.
- 3. The holder of the authorisation is responsible for ensuring compliance with the conditions contained in this Environmental Authorisation. This includes any person acting on the holder's behalf, including but not limited to, an agent, servant, contractor, sub-contractor, employee, consultant, or person rendering a service to the holder of the authorisation.
- 4. The activities authorised may only be carried out at the property as described above.
- 5. Any changes to, or deviations from, the project description set out in this Environmental Authorisation must be approved, in writing, by the Department before such changes or deviations may be effected. In assessing whether to grant such approval or not, the Department may request such information as it deems necessary to evaluate the significance and impacts of such changes or deviations and it may be necessary for the holder of the authorisation to apply for further Environmental Authorisation in terms of the regulations.
- 6. The holder of an Environmental Authorisation must apply for an amendment of the Environmental Authorisation with the Competent Authority for any alienation, transfer or change of ownership rights in the property on which the activity is to take place.
- 7. This activity must commence within a period of ten (10) years from the date of issue of this Environmental Authorisation. If commencement of the activity does not occur within that period, the authorisation lapses and a new application for Environmental Authorisation must be made for the activity to be undertaken.

\$

- 8. Construction must be completed within five (10) years of the commencement of the activity on site.
- 9. Commencement with one activity listed in terms of this environmental authorisation constitutes commencement of all authorised activities.

Notification of authorisation and right to appeal

- 10. The holder of the authorisation must notify every registered interested and affected party, in writing and within 14 (fourteen) calendar days of the date of this Environmental Authorisation, of the decision to authorise the activity.
- 11. The notification referred to must -
 - 11.1. specify the date on which the authorisation was issued,
 - 11.2. inform the interested and affected party of the appeal procedure provided for in the National Appeal Regulations, 2014,
 - 11.3. advise the interested and affected party that a copy of the authorisation will be furnished on request; and
 - 11.4. give the reasons of the Competent Authority for the decision.

Commencement of the activity

12. The authorised activity shall not commence until the period for the submission of appeals has lapsed as per the National Appeal Regulations, 2014, and no appeal has been lodged against the decision. In terms of Section 43(7), an appeal under Section 43 of the National Environmental Management Act, Act No. 107 of 1998, as amended will suspend the Environmental Authorisation or any provision or condition attached thereto. In the instance where an appeal is lodged you may not commence with the activity until such time that the appeal has been finalised.

Management of the activity

13. A copy of the final site layout map must be made available for comments to the registered Interested and Affected Parties and the holder of this environmental authorisation must consider such comments. Once amended, the final development layout map must be submitted to the Department for written approval prior to commencement of the activity. This final layout must adhere to the 5km no-turbine buffer around the Martial Eagle nest during the final layout approval process. Existing infrastructure must be used as far as possible e.g., roads.

4

The layout map must indicate the following:

ŧ

- 13.1. The position of the wind turbines,
- 13.2. All associated infrastructure,
- 13.3. Powerline and the coordinates,
- 13.4. Onsite Substation and the coordinates,
- 13.5. The BESS and the coordinates,
- 13.6. Operations and maintenance (O&M) building infrastructure
- 13.7. The proposed internal road (length and width),
- 13.8. Construction laydown areas, buildings and their coordinates,
- 13.9. All sensitive features, i.e., Martial Eagle nest, graves, CBA, wetlands, etc., and
- 13.10. All "no-go" and buffer areas.
- 14. The Environmental Management Programme (EMPr) submitted as part of the ElAr is not approved and must be amended to include measures as dictated by the final site lay-out map. The EMPr must be made available for comments by registered Interested and Affected Parties and the holder of this environmental authorisation must consider such comments. Once amended, the final EMPr must be submitted to the Department for written approval prior to commencement of the activity. Once approved the EMPr must be implemented and adhered to.
- 15. The EMPr must be implemented and strictly enforced during all phases of the project. It shall be seen as a dynamic document and shall be included in all contract documentation for all phases of the development when approved.
- 16. Changes to the approved EMPr must be submitted in accordance to the EIA Regulations applicable at the time.
- 17. The Department reserves the right to amend the approved EMPr should any impacts that were not anticipated or covered in the EIAr be discovered.

Frequency and process of updating the EMPr

- 18. The EMPr must be updated where the findings of the environmental audit reports, contemplated in Condition 25 below, indicate insufficient mitigation of environmental impacts associated with the undertaking of the activity, or insufficient levels of compliance with the environmental authorisation or EMPr.
- 19. The updated EMPr must contain recommendations to rectify the shortcomings identified in the environmental audit report.
- 20. The updated EMPr must be submitted to the Department for approval together with the environmental audit report, as per Regulation 34 of the EIA Regulations, 2014 as amended. The updated EMPr must

...

have been subjected to a public participation process, which process has been agreed to by the Department, prior to submission of the updated EMPr to the Department for approval.

- 21. In assessing whether to grant approval of an EMPr which has been updated because of an audit, the Department will consider the processes prescribed in Regulation 35 of the EIA Regulations, 2014 as amended. Prior to approving an amended EMPr, the Department may request such amendments to the EMPr as it deems appropriate to ensure that the EMPr sufficiently provides for avoidance, management and mitigation of environmental impacts associated with the undertaking of the activity.
- 22. The holder of the authorisation must apply for an amendment of an EMPr, if such amendment is required before an audit is required. The amendment process is prescribed in Regulation 37 of the EIA Regulations, 2014, as amended. The holder of the authorisation must request comments on the proposed amendments to the impact management outcomes of the EMPr or amendments to the closure objectives of the closure plan from potentially interested and affected parties, including the competent authority, by using any of the methods provided for in the Act for a period of at least 30 days.

Monitoring

- 23. The holder of the authorisation must appoint an experienced Environmental Control Officer (ECO) for the construction phase of the development that will have the responsibility to ensure that the mitigation/rehabilitation measures and recommendations referred to in this environmental authorisation are implemented and to ensure compliance with the provisions of the approved EMPr.
 - 23.1. The ECO must be appointed before commencement of any authorised activities.
 - 23.2. Once appointed, the name and contact details of the ECO must be submitted to the *Director: Compliance Monitoring* of the Department.
 - 23.3. The ECO must keep record of all activities on site, problems identified, transgressions noted and a task schedule of tasks undertaken by the ECO.
 - 23.4. The ECO must remain employed until all rehabilitation measures, as required for implementation due to construction damage, are completed and the site is ready for operation.

Recording and reporting to the Department

24. All documentation e.g., audit/monitoring/compliance reports and notifications, required to be submitted to the Department in terms of this environmental authorisation, must be submitted to the Director: Compliance Monitoring of the Department.

....

- 25. The holder of the environmental authorisation must, for the period during which the environmental authorisation and EMPr remain valid, ensure that project compliance with the conditions of the environmental authorisation and the EMPr are audited, and that the audit reports are submitted to the *Director Compliance Monitoring* of the Department.
- 26. The frequency of auditing and of submission of the environmental audit reports must be as per the frequency indicated in the EMPr, considering the processes for such auditing as prescribed in Regulation 34 of the EIA Regulations, 2014 as amended.
- 27 The holder of the authorisation must, in addition, submit environmental audit reports to the Department within 30 days of completion of the construction phase (i.e., within 30 days of site handover) and a final environmental audit report within 30 days of completion of rehabilitation activities.
- 28. The environmental audit reports must be compiled in accordance with Appendix 7 of the EIA Regulations, 2014 as amended and must indicate the date of the audit, the name of the auditor and the outcome of the audit in terms of compliance with the environmental authorisation conditions as well as the requirements of the approved EMPr.
- 29. Records relating to monitoring and auditing must be kept on site and made available for inspection to any relevant and competent authority in respect of this development.

Notification to authorities

30. A written notification of commencement must be given to the Department no later than fourteen (14) days prior to the commencement of the activity. Commencement for the purposes of this condition includes site preparation. The notice must include a date on which it is anticipated that the activity will commence, as well as a reference number.

Operation of the activity

31. A written notification of operation must be given to the Department no later than fourteen (14) days prior to the commencement of the activity operational phase.

Site closure and decommissioning

32. Should the activity ever cease or become redundant, the holder of the authorisation must undertake the required actions as prescribed by legislation at the time and comply with all relevant legal requirements administered by any relevant and Competent Authority at that time.

\$.

Specific conditions

- 33. Construction must only commence once the Protected Area status (Proclaimed Private Nature Reserve: Langcarel Private Nature Reserve) has been withdrawn or deproclaimed for the directly affected properties (i.e., Portion 1 and 2 of Farm No. 322 {Welgelegen).
- 34. A walk down as recommended by the terrestrial and avifaunal specialists must be conducted prior construction. The outcome of the walkthrough must inform the final layout, and this must be included in the EMPr.
- 35. The footprint of the development must be limited to the areas required for actual construction works and operational activities.
- 36. A permit must be obtained from the relevant nature conservation agency for the removal or destruction of protected or endangered plant or animal species.
- 37. No exotic plants must be used for rehabilitation purposes. Only indigenous plants of the area must be utilised.
- 38. Avifaunal monitoring and recording of bird mortalities must be undertaken during the implementation and operational phase for the first 2 years and then at every five years thereafter. This information must be disclosed to the Mpumalanga Tourism and Parks Agency (MTPA) Scientific Services data base.
- 39. All excavations into bedrock must be monitored by a suitably qualified palaeontologist and a report on the outcomes of the monitoring activities must be submitted to SAHRA on completion of the development of the facility.
- 40. Construction must include design measures that allow surface and subsurface movement of water along drainage lines so as not to impede natural surface and subsurface flows. Drainage measures must promote the dissipation of storm water run-off.
- 41. The cemetery at CA003 should be avoided with a 30m buffer zone and fenced with an access gate for family members.
- 42. Should any archaeological sites, artefacts, paleontological fossils, or graves be exposed during construction work, work in the immediate vicinity of the find must be stopped, the South African Heritage Resources Agency (SAHRA) must be informed, and the services of an accredited heritage professional obtained for an assessment of the heritage resources.
- 43. Hazardous substances must be stored in a bunded and designated area to avoid accidental leakage into the environment.
- 44. An integrated waste management approach must be implemented that is based on waste minimisation and must incorporate reduction, recycling, re-use and disposal where appropriate. Any solid waste must

....

be disposed of at a landfill licensed in terms of Section 20 (b) of the National Environment Management Waste Act, 2008 (Act No.59 of 2008).

General

- 45. A copy of this Environmental Authorisation, the audit and compliance monitoring reports, and the approved EMPr, must be made available for inspection and copying-
 - 45.1. at the site of the authorised activity,
 - 45.2. to anyone on request; and
 - 45.3. Where the holder of the Environmental Authorisation has a website, on such publicly accessible website.
- 46. National government, provincial government, local authorities or committees appointed in terms of the conditions of this authorisation or any other public authority shall not be held responsible for any damages or losses suffered by the holder of the authorisation or his/her successor in title in any instance where construction or operation subsequent to construction be temporarily or permanently stopped for reasons of non-compliance by the holder of the authorisation with the conditions of authorisation as set out in this document or any other subsequent document emanating from these conditions of authorisation.

Date of Environmental Authorisation:

Misha

Ms Milicent Solomons Acting Chief Director: integrated Environmental Authorisations Department of Forestry, Fisheries and the Environment

Annexlire 1: Reasons for Decision

1. Information considered in making the decision

In reaching its decision, the Department took, inter alia, the following into consideration -

- a) The listed activities as applied for in the application form received on 24 February 2022.
- b) The email dated 01 March 2023 clarifying listed activities.
- c) The email dated 01 March 2023 confirming the withdrawal or deproclaiming of the Langcarel Private
 Nature Reserve declared under the Game Ordinance, 1949 (No. 23 of 1949) and the Native Flora
 Protection Ordinance, 1940 (No. 9 of 1940).
- d) The acceptance of final scoping report issued on 23 May 2022.
- e) The information contained in the final EIAr dated 31 October 2022.
- f) The comments received from all interested and affected parties as included in the final EIAr dated 31 October 2022.
- g) Mitigation measures as proposed in the El Ar and the EMPr for the facility and the generic EMPrs dated
 31 October 2022.
- h) The information contained in the specialist studies contained within the appendices of the final EIAr.

2. Key factors considered in making the decision

All information presented to the Department was considered in the Department's consideration of the application. A summary of the issues which, in the Department's view, were of the most significance is set out below.

- a) The findings of all the specialist studies conducted and their recommended mitigation measures.
- b) The need for the proposed project ties in with the national government policies, plans, and programmes which have relevance to energy planning and production.
- c) The final EIAr dated 31 October 2022 identified all legislations and guidelines that have been considered in the preparation of the EIAr.
- d) The methodology used in assessing the potential impacts identified in the final EIAr dated 31 October
 2022 and the specialist studies have been adequately indicated.
- e) A sufficient public participation process was undertaken, and the applicant has satisfied the minimum requirements as prescribed in the EIA Regulations, 2014 as amended for public involvement.

3. Findings

After consideration of the information and factors listed above, the Department made the following findings *

- a) The identification and assessment of impacts are detailed in the final El Ar dated 31 October 2022 and sufficient assessment of the key identified issues and impacts have been completed.
- b) The procedure followed for impact assessment is adequate for the decision-making process.
- c) The proposed mitigation of impacts identified and assessed adequately curtails the identified impacts.
- d) EMPr measures for the pre-construction, construction and rehabilitation phases of the development were proposed and included in the EIAr and will be implemented to manage the identified environmental impacts during the construction phase.

In view of the above, the Department is satisfied that, subject to compliance with the conditions contained in the environmental authorisation, the authorised activities will not conflict with the general objectives of integrated environmental management laid down in Chapter 5 of the National Environmental Management Act, 1998 and that any potentially detrimental environmental impacts resulting from the authorised activities can be mitigated to acceptable levels. The environmental authorisation is accordingly granted.

Ms, Milicent Solomons Director: Priority Infrastructure Projects

Dear Ms. Solomons

APPOINTMENT AS CHIEF DIRECTOR: INTERGRATED ENVIRONMENTAL AUTHORISATIONS (ACTING), FROM 01 MARCH UNTIL 31 MARCH 2023

I hereby inform you that I have decided to appoint you as Acting Chief Director: Intergrated Environmental Authorisations from 01 March until 31 March 2023.

All correspondence and other documents that are usually signed by the Chief Director: Intergrated Environmental Authorisations during must be signed under Acting Chief Director: Intergrated Environmental Authorisations during the above-mentioned period.

Your appointment in the above acting position remains subject to the provisions of the Public Service Act, 1994 (Proclamation No. 103 of 1994), as amended, the Government Employees Pension Fund Act, 1996 (Proclamation No. 21 of 1998), the regulations promulgated under these Acts and relevant circulars.
