**REF: HUMAN REMAINS FOUND AT KINROSS EXT 30**

---

Dear Sir/Madam

We write to advise you that bones which were accidentally unearthed during trenching for water and waste reticulation at Kinross Ext 30 have been confirmed to be human bones representing a single individual.

As you should be aware a report was lodged at the local Police Station (SAPS):  
Case No 49/11/2017

This matter requires that the local communities be informed through existing local political and civic structures. Once this consultation has been done the local Councillor/s and other civic leaders should formally write to us advising us of same, thereby giving a green light for the human bones to be reburied in a formal cemetery. This is in accordance with the law, the National Heritage Resources Act.

Sincerely

Oscar Sithole (B Eng Civil)
